# Sero=Diagnosis of Pregnancy

This Laboratory is now fully equipped and ready to perform the new Serum Test for Pregnancy as originated by Abderhalden. Fee for this test ten dollars.

We are, also, equipped to perform all types of research, microscopic and analytical work for physicians. Wassermann tests. Complement-fixation test for gonorrhoea. Auto-vaccines prepared. Stock vaccines furnished. All investigations made by laboratory and clinical experts. Fee tables and instructions for sending specimens on application.

We have established a separate department of instruction in all branches of Clinical Diagnosis. Write us for particulars.

WASSERMANN TEST FOR SYPHILIS.....	\$10.00
URINALYSIS, CHEMICAL AND MICROSCOPICAL....	1.50
WIDAL TEST FOR TYPHOID.....	1.00
TISSUES, PATHOLOGICAL EXAMINATION.....	5.00
STOCK VACCINES, PER DOZEN.....	5.00
COMPLEMENT-FIXATION TEST FOR GONORRHOEA	10.00
SPUTUM AND SMEARS.....	1.00
BLOOD COUNT AND HEMOGLOBIN.....	3.00
DIFFERENTIAL COUNT OR MALARIA.....	1.00
AUTOGENOUS VACCINES.....	10.00

# PHENOCO

**Deodorant**

(Emulsified Phenol Homologues)

**GERMICIDE**

Contains Inert Material 6% Water—Guaranteed "Hygienic Laboratory Phenol Coefficient" 15

Phenoco is guaranteed to be a most powerful germicide and is invaluable for destroying the germs of all contagious and infectious diseases. Although such a powerful germicide, Phenoco is only about one-half as toxic as Phenol or in comparison with its germicidal action one-thirtieth as toxic as Phenol.

As Phenoco has many and various uses in minor surgery, therapeutics and diseases of the skin, the physician is respectfully requested to consult our literature on the subject and to exercise his judgment as to the most suitable solution to use in each particular case.

**DIRECTIONS**—To prepare solution pour cold or warm water on the fluid and stir well. Do not use boiling water.

Guaranteed by the West Disinfecting Co. under the Insecticide Act of 1910, Serial No. 156. Guaranteed by the West Disinfecting Co. under the Pure Food and Drugs Act, June 30, 1906, Serial No. 1955.

## REPORT OF THE CHAIRMAN OF ALUMNI RELATIONS AND REUNION COMMITTEE

"And that I can assure you that I will ever be ready to be in the field in the interest of the Alumni of our Alma Mater, 'Old Rush.'"

These were the closing remarks of my address before this body in June last year, 1912, as your retiring President. At that meeting I was elected Chairman of a Committee on "Alumni Reunion," and as such it is my duty to make a report of the work accomplished in this field during the past year. In the early fall of last year a circular letter was sent out to Rush men in about twenty states requesting their co-operation in behalf of the Alumni extension, receiving a favorable reply from about one-half of that number.

Earnest efforts are being made for Rush Alumni Reunions at every state medical society meeting, as well as at every meeting of the A. M. A. It gives me great pleasure to report to this body the following Alumni Reunions held, with the great prospect of still larger and more enthusiastic gatherings at future State Medical Society meetings.

1. At the Indiana State Medical Association meeting at Indianapolis in October last (1912) a small but enthusiastic Rush Alumni gathering was brought about chiefly through the efforts of Dr. Fred A. Tucker of Noblesville, Indiana, the President of the State Board of Health. Dr. Wilber F. Post of the Rush Faculty, Department of Medicine, Class 1903, was in attendance and spoke for the College, her illustrious past, her present high standard in medical education and her still more eminent position as a teaching institution of the future.

2. Early this year, in February, 1913, as a forerunner of what we may anticipate at the Illinois State Medical Meeting at Peoria in May next, a dinner was given at Peoria by Drs. Marcus Whiting and J. P. McMahon, '83, in commemoration of the thirtieth anniversary since graduating from Rush to the forty local Rush graduates; thirty-three were in attendance at that gathering, the remaining seven sending their regrets at not being able to attend because of professional duties. This meeting is going to be an annual affair, with promise of inviting all Rush graduates residing in the county.

3. At the North Dakota State Medical Society Meeting at Minot, May 7 and 8, a Rush Alumni Reunion was held; not a very

large but a loyal Rush crowd was in attendance. Dr. A. Carr, Minot, '87, and Dr. H. H. Healy, Grand Forks, '85, arranged for this reunion. Dr. Dodson, Dean of the Rush Faculty, was present, representing the college. He exhibited at the Orpheum Theatre some lantern slides of the college, the university, and showed many pictures from members of the old faculty as well as of the new, after which an informal discussion and luncheon followed.

4. At the meeting of the Illinois State Medical Society at Peoria, May 20 and 21, chiefly through the efforts of Drs. O. B. Will and Allison a large gathering of Rush Alumni was brought about. It was by far the largest state gathering ever held outside of Chicago. More than 120 graduates were in attendance. Full particulars about this meeting will appear in a near issue of the BULLETIN.

5. This meeting speaks for itself. Nearly every class since 1864 is here represented, and nearly a half a century of Rush graduates are here assembled. From 1864 to 1913 equals just 49 years. A continuous chain, a linking of the old methods of medical teaching in vogue long since before the war, with the present teaching as typified in the class of 1913, graduates in medicine of the highest order, of the highest medical attainments.

6. The coming meeting of Rush Alumni next week at Minneapolis, Minn., at the A. M. A. assembly, promises to be a record breaker. Dr. Jehiel W. Chamberlain of St. Paul, the local chairman on Alumni affairs, has written me repeatedly. He has the matter well in hand and I am looking forward to a most creditable reunion.

7. The following state medical society meetings are scheduled for the early fall, and Rush Alumni Reunions should be a distinctive and positive feature at each one.

Indiana, Sept. 25 and 26, at West Baden; Dr. Fred A. Tucker, Noblesville, Ind., chairman. Ohio, Sept. 2 to 4, at Cedar Point; Dr. Ury, Defiance, Ohio, chairman. Wisconsin, Oct. 1-2, at Milwaukee; Dr. Byron M. Caples, Waukesha, Wis., chairman. Colorado, Oct. 7-9, at Glenwood Springs; Dr. Robert C. Robe, Pueblo, Colo., chairman. Minnesota, Oct. at Minneapolis; Dr. Jehiel W. Chamberlin, St. Paul, Minn., chairman. Tri-State (in September) Washington, Idaho and Oregon; Dr. O. H. Avey, Payette, Idaho, chairman and secretary.

Respectfully submitted,

JOHN RITTER,

Chairman Alumni Reunion and Relations Committee.

RUSH ALUMNI REUNION AT THE MINNEAPOLIS  
MEETING OF THE AMERICAN MEDICAL  
ASSOCIATION

Meeting called to order by the Chairman of the Alumni Reunion Committee, John Ritter. After a few words of welcome from the chair, the oldest alumnus present was introduced, Dr. Chas. Hill of Pine Island, Minn., who graduated in 1857. The doctor is now in his eighty-sixth year, and states that he is still in the harness and his heart is as young for old Rush as it was when he first entered the old school long before the fire, presided over by its founder, the late Dr. Brainard.

The next old graduate to respond was Dr. Russell F. Goodwin, Minneapolis, Class '70, and the class of '74 was represented by Dr. F. H. Lord, Plano, Ill., and Dr. Otto Steen, Cottage Grove, Minn. Both responded in a few well chosen words for the good of old Rush. Next to respond was Dr. Norman Bridge of Los Angeles, Cal., Class '78. He paid a high compliment to Rush and its work as the finest teaching institution in medical education. In closing his remarks he introduced the following resolution that was adopted by a rising vote:

*Resolved* by this gathering of two hundred alumni of Rush Medical College, that we extend to our fellow alumnus, Geo. H. Simmons our felicitations and confidence, and our thanks and appreciation for the work he has done of enormous value for the profession and the people, through his able management of the greatest medical journal in the world.

Dr. John M. Dodson spoke for the school, devoting his remarks chiefly to the incoming students and the outgoing graduates, and Rush's effort for each graduate to have a hospital training. Dr. A. M. Corwin, the newly elected president of the Rush Alumni Association, spoke in glowing terms of Rush's progress and its future.

Dr. A. L. Brittin, Athens, Ill., President-elect of the State Medical Society, Dr. A. C. Cotton, Dr. Jehiel W. Chamberlain of St. Paul, Minn., local chairman of Alumni Reunion, through whose efforts and the effort of Dr. Sheldon of Minneapolis the splendid gathering was brought about, were all called upon for a few remarks of felicitation and good cheer. Dr. Vanderslice, Illinois State Milk Commission, was called upon to tell us something about the number of bacteria we are supposed to consume in the ice cream served. He responded in a few well chosen and humorous remarks. Among the other speakers may be mentioned Dr. John R. McDill, Milwaukee, Class '85, Dr. Chas. H. Parkes, Chicago, Class '97.

The total registered number in attendance was 156. The class of 1897 had the proud distinction of standing ahead with 13 mem-

bers present. It was followed closely by the classes of 1900 and 1902 with 12 members each. There were present 10 members of the class of 1906, and 9 each from the classes of 1893 and 1895. The class of 1882 showed up with 6 members present, which is not half bad when one considers they have been scattered over 30 years. Altogether it was a memorable occasion, and one not easily effaced from the memory of those who took part in it.

The following alumni were present:

- '57. Charles Hill, Pine Island, Minn.
- '70. Russell F. Goodwin, Minneapolis, Minn.
- '72. Geo. P. Merritt, Saint Peter, Minn.
- '74. F. H. Lord, Plano, Ill.
- '74. Otto Steen, Cottage Grove, Minn.
- '78. Norman Bridge, Los Angeles, Cal.
- '78. Alfred C. Cotton, Chicago.
- '78. F. O. Sherwin, Duluth, Minn.
- '79. J. A. DuBois, Sauk Center, Minn.
- '79. F. R. Woodard, Minneapolis, Minn.
- '80. Wm. H. Ellis, Barron, Wis.
- '80. John M. Dodson, Chicago.
- '81. Vincent J. Hawkins, St. Paul, Minn.
- '81. H. G. Murdock, Taylor Falls, Minn.
- '81. Isaac Bigelow, Dubuque, Iowa.
- '82. J. W. Chamberlin, St. Paul, Minn.
- '82. John B. Darling, St. Paul, Minn.
- '82. Geo. Hofstetter, Clinton, Iowa.
- '82. A. J. Murdock, Minneapolis, Minn.
- '82. Jesse Long, Minneapolis, Minn.
- '82. W. T. Sarles, Sparta, Wis.
- '83. George Keenan, Madison, Wis.
- '83. Geo. E. Moore, Ironwood, Mich.
- '83. Benj. M. Randall, Graceville, Minn.
- '83. Cassius D. Wescott, Chicago.
- '83. F. S. Wiley, Fond du Lac, Wis.
- '84. Albert L. Britton, Athens, Ill.
- '85. J. E. Engstad, Minneapolis, Minn.
- '85. John R. McDill, Milwaukee, Wis.
- '86. H. H. Witherstine, Rochester, Minn.
- '87. S. S. Glasscock, Kansas City, Kans.
- '89. Jared W. Daniels, St. Peter, Minn.
- '89. P. McKittrick, Eau Claire, Wis.
- '89. Geo. H. Weaver, Chicago.
- '90. D. N. Jones, Gaylord, Minn.
- '90. A. M. Corwin, Chicago.
- '91. C. A. Parker, Chicago.
- '92. August N. Anderson, Lincoln, Neb.
- '92. H. H. Healy, Grand Forks, N. Dak.
- '92. J. B. Robertson, Cottonwood, Minn.
- '92. L. C. Weeks, Detroit, Minn.
- '93. M. H. Cremer, Red Wing, Minn.
- '93. R. C. Fullenweather, La Salle, Ill.
- '93. Emory H. Bayley, Lake City, Minn.
- '93. Alfred N. Bessesen, Minneapolis, Minn.
- '93. R. W. Holmes, Chicago.
- '93. R. Lord, Cedar Rapids, Iowa.
- '93. Wm. R. Parkes, Evanston, Ill.

- '93. J. W. Vanderslice, Oak Park, Ill.
- '93. C. R. Whitney, Fonda, Iowa.
- '94. F. P. Lierle, Marshalltown, Iowa.
- '94. Chas. R. Moore, Chicago.
- '94. A. L. Thompson, Ortengo.
- '94. E. Windmuller, Woodstock, Ill.
- '95. J. C. Harding, St. Paul, Minn.
- '95. J. H. Hames, Stillwater, Minn.
- '95. T. M. Jewell, Mindoro, Wis.
- '95. W. J. McGrath, Elkader, Iowa.
- '95. Jas. J. Pattee, Pueblo, Colo.
- '95. Rolland Parmeter, Detroit, Mich.
- '95. W. D. Sheldon, Minneapolis, Minn.
- '95. W. E. Shallenberger, Canton, Ill.
- '95. J. H. Urquhart, Ironwood, Mich.
- '96. Elmer L. Kenyon, Chicago.
- '96. Homer P. Dredge, Sandstone, Minn.
- '96. W. L. Brown, El Paso, Texas.
- '96. J. H. Dudley, Windom, Minn.
- '96. H. L. Palmer, Albert Lea, Minn.
- '96. W. E. Richardson, Slayton, Minn.
- '96. N. W. Culbertson, Massillon, Ohio.
- '96. Geo. W. Nott, Racine, Wis.
- '97. Frederick Barrett, Gilbert, Minn.

## TREASURER'S REPORT JUNE, 1912, TO JUNE, 1913

### ALUMNI ASSOCIATION

Balance June, 1912.....	\$ 89.79
Cash received during the year.....	1,168.53
	\$1,258.32
Expended .....	1,099.10
Balance to deposit Alumni Association.....	\$ 159.22

## FELLOWSHIP FUND

Balance June, 1912.....	\$ 152.05
Cash received during year with dues.....	247.95
Cash from savings account.....	145.95

\$ 545.95

Paid to fellow.....	400.00
---------------------	--------

Balance in checking account.....	\$ 145.95
----------------------------------	-----------

## FELLOWSHIP FUND SAVINGS ACCOUNT

Balance .....	\$ 570.79
---------------	-----------

From this report it can be seen that \$1,173.53 was received the past year; of this amount \$80.45 was paid to the Alumni Association for advertising matter in the BULLETIN.

The remaining \$1,093.08 represents Alumni dues received. This means that almost 1,100 members of the Alumni Association paid their dues.

The credit for the good showing in paid up membership belongs to Dr. B. M. Linnell; this has been accomplished by his constant energy and push in working for the Alumni Association. Money for the Fellowship fund has not been coming in as in the past years, and as a consequence money had to be taken from the savings account in order to pay the Fellow. I would suggest that hereafter every member when sending Annual Alumni dues also contribute one or more dollars for this Fellowship fund. In this way more than enough money would be at hand to pay for valuable research work done by the Fellow.

Every dollar sent either to the Alumni Association or Fellowship fund means a boost for "Good Old Rush".

Fraternally,

HENRY H. KLEINPELL.

---

## THE FUTURE OF THE MEDICAL MAN \*

JOHN GEORGE ADAMI, M.D.

Professor of Pathology and Bacteriology, McGill University Medical Faculty  
MONTREAL

*Gentlemen of the Graduating Class:*

Need I tell you how I appreciate the honor that has been conferred on me by your dean and the medical faculty of Rush Medical College by asking me to address you this afternoon at this, the culminating moment of your university career? But let me confess to you that with the honor comes the sense of heavy responsibility. From him to whom much is given much is also asked.

---

\* Commencement address at Rush Medical College, Chicago, June 12, 1913.

Time and again in the years that are to come, this graduation ceremony will recall itself to the minds of each one of you as marking an epoch. It would be well could I utter words which should impress themselves in such a way that they remain with you as part and parcel of the event, words memorable for themselves as well as of the occasion; but if the utterance of such words is given to few, very few, of us, it is proper that what I say should be not unworthy, that it should attune itself to the occasion. It would be out of harmony with the event were I to seize this opportunity to deliver my message as a pathologist, and enunciate my views concerning some moot point in medical science; were I to read you a lecture on advanced pathology.

I must perforce strive to utter thus that which will appeal to each of you, that which will be helpful. During the last few years you have been satiated with lectures on special topics; to-day it is for me to strive to sum up the significance of all this teaching—all this education—in one comprehensive address. For four years—aye, and for long years previously—you have been preparing to enter the practice of medicine; to-day you are at the very entrance of that practice, at the threshold; to-day the university gives you its testamur. Each one of you must be asking, "What of the future?" Now, I am far from wishing to inflict a sermon on you, but at this particular moment I do but reecho the thought that is uppermost in all your minds. All the work of all these years has led to this moment, and now what next? What about the years that are to come?

#### NATURE OF TRUE KNOWLEDGE

Well, gentlemen, I trust that I shall not shock you too much when I lay down that you know next to nothing; you are but at the beginning of knowledge. I say this knowing perfectly well that there is no period in the whole of a man's existence when he feels so replete, so distended, with medicine as immediately following on the final examination and graduation. I speak knowingly, for I have been there myself. But, gentlemen, this sensation is comparable to that of the woman who, suffering from flatus, imagines herself to be in the latter months of pregnancy. It is an equally false conception. In the first place, in a four-year course, however well conducted, your teachers can have given you but the basal outlines of their respective subjects. We know how small a portion of one subject we can instil into you in the brief months during which you sit under each one of us. That is the reason why we are constantly striving to lengthen our courses—why each year you are made to feel more and more the heavy burden of the training. The better the teacher, the more, I think, his conscience pricks him for the inevitable deficiencies of his curriculum; and, paradoxically, I may add, the simpler and more elementary he makes

his teaching, realizing that, as his subject cannot possibly be covered, his time is best employed in laying down secure foundations on which later the student may build a fair and seemly superstructure.

In the second place, true knowledge consists not in cognition, in the possession of a store of facts, but in the capacity to utilize them. You may be chock full of medical data, but until you have learned to employ these data, until you have tested their value in practice, you are but, as it were, sucklings in medicine. Heaven preserve the patients of the man who passes straight from graduation into private practice! Great as is the *vis medicatrix naturae*, that imposes all too heavy a strain on it. This only would I say, that the vast increase in the practical work of the course that has been brought about during the last generation should make the student more secure of his data, more capable of using them with advantage; but notwithstanding the increased contact with the actual patient during the last two years of the course, which in comparison with your predecessors you have been afforded, I still doubt whether to-day the student on graduation is as capable of launching out into the world, is as serviceable to his patient, as was the product of the days of apprenticeship forty years ago. When it comes to a matter of differential diagnosis, he may be vastly his superior; but in knowledge of treatment of the patient as distinct from his disease, he is as vastly inferior. Wherefore, I trust that one and all of you before me have dedicated yourselves to at least a year of hospital internship, that you may learn the art as distinguished from the science of medicine.

That learned old physician, John Caius, physician in succession to Edward VI, Mary and Elizabeth (at whom, indeed, Shakespeare seems to have poked fun), when he refounded the college which bears his name in Cambridge, with that love of symbolism not uncommon in his generation, built three gates. The gate of entrance with its little wicket (now significantly removed as a relic into a back garden) he called the Gate of Humility. In the mid-space of the college, supported on either side by the students' rooms and college buildings proper (which on their foundation stone were dedicated to Knowledge) was and still is a wide and lofty archway, of almost Roman simplicity and severity, with the inscription "*Virtutis*"—the Gate of Virtue (and of Wisdom). At the farther end, leading out to the public schools, where the university confers its degrees, is the exquisite and richly ornamented Gate of Honor, about the earliest example of Italian Renaissance architecture to be found in England. All of which is a parable. I for long wondered why Caius when he made this gate so beautiful made it so diminutive. On first thought, one would expect something of goodly size, suggesting a triumphal arch. But no, the passage through it is narrower and lower than that through the

old gate of entrance; the Gate "Virtutis" would as it were swallow several of it. Did he not here intend another parable—that the man who completes his course with honor should pass out, out of the college into the wider world, even as he entered college, with becoming and even greater humility?

You are thus at the beginning of medical learning, not at its end; but if true medical knowledge and wisdom come with practice—if you as medical men are to be students all through the days of your active life—how are you to comport yourselves toward your profession?

#### MEDICINE AS A BUSINESS

Here on the borders of the West, I feel some delicacy in entering on this subject; but at the same time, for the love of my profession, I recognize the necessity that I should speak frankly and urgently. For what in the East we call "the Western spirit" has entered into medicine. I protest against this appellation: this spirit is neither Eastern nor Western; it affects the whole continent; it affects the modern world in general; it is the spirit of the age. We live in an age when a man's status is determined by his apparent wealth. That is inevitable with progressive democratization. Worth may make the man and the want of it the fellow. The more philosophic we are, the more freely we admit with the poet that all else is "leather and prunella"; but notwithstanding and nevertheless, save in the most outstanding cases, worth carries with it no social recognition—it is imponderable. Man—and woman—demands some standard of comparison, and if relative rank be largely abolished, there is nothing to fall back on but worldly possessions, whence it is that, whereas of old the physician, and his wife, had a status dependent on his profession—whereas he ranked next to the lawyer, and as a professional man took precedence of those engaged in commerce—to-day he who has scooped his millions from the manufacture of a quack remedy is accounted the greater, and takes without shame the upper seat; and almost perforce the physician is driven to strive after more than a mere modest competence, if he is to be of standing in the community.

Therefore the student entering medicine to-day is apt to have before him something not included in the hipocratic oath. Certain it is that an increasing proportion of medical men is more concerned over the means of improving its balance in the bank than over the means of improving the health of its patients, and regards social success as more to be considered than professional capacity. What is more, other influences are leading in the same direction. It is to the credit of the young manhood of this country and this generation that it realizes as never before its duty to make its own way in the world. To me there is something splendid in this

impatience of the yoke of indebtedness, in the determination to repay at the earliest moment, whether to parent or family friend, the heavy cost of the medical course. Often, it is true, I am torn between admiration and regret. I see men who, I am convinced, would become leaders in the profession could they devote a year or two to advanced medicine and research, men who would thereby reap some fifty, some one hundred-fold in the years that are to come, shortsightedly, as it seems to me, let slip the opportunity and consign themselves to mediocrity in their keen anxiety to be out of debt and independent. I think that in such cases my admiration predominates, but my regret is also poignant; but such men inevitably begin practice with the need to make a pecuniary success almost too prominently and constantly before them.

Then, again, it is but human to hold that there be a certain ratio between the amount of capital invested in any enterprise and the return yielded thereby. We may regard the time and money expended on his education by or on behalf of the medical student as the equivalent of capital invested. Within a generation—within little more than half a generation—this requisite capital has increased to an extraordinary extent. This fact was brought rudely before me within the last few days, when discussing with my old friend, the dean of the medical faculty of the University of Minnesota, Professor Westbrook, the developments that have occurred in the seventeen years during which he has been connected with that school. In 1895, when he joined the faculty, all that was demanded of the student was a course of three years of seven months each; in all twenty-one months' instruction. Soon that was raised to four years of nine months—thirty-six months—more than half as much again. To-day, before the degree is granted, the university and the state demand six years of nine months (two years in arts and four in medicine), and one full year of twelve months in a hospital approved by the university. The three years of 1895 have given place to seven years, the twenty-one months to sixty-six. The time capital has been more than trebled, and the same must be true of the pecuniary outlay; and when we compare the difference in the quality as well as in the quantity of education afforded, when we realize the quality of the output, is it to be wondered at that the physician of to-day should demand a higher return?

#### MEDICINE AS A PROFESSION

And yet, gentlemen, while admitting that there is an evident increase in the number of those medical men who regard their work as a business, the noble fact remains that to-day as in all ages the lure of medicine is such that the majority follow it from pure love of the work and of their fellows. The majority still devote themselves to it with the old spirit, caring little about the mone-

tary return so long as they are secure of a decent competence; they regard it as what it is—a profession and not a trade. Their life work is to bring healing to the sick, to make the weak strong, to soothe the suffering, to help their kind. This to them is before all else. And here, in aiding poor humanity, the physician's work approaches the divine: It is at least suggestive that, as Dr. James Douglas has pointed out, of the twenty or twenty-two miracles recorded as being performed by the Founder of the Christian religion, no less than seventeen are acts of healing, of raising the sick, of restoring sight to the blind, of curing the palsied, of so-called casting out of devils, or restoring those apparently dead to life. It was through this power in healing the sick that Christ impressed his divinity on his generation. Whatever our faith or want of faith, this must strike us as most significant. "From the Most High cometh healing."

Indeed, this same spirit of devotion to the main object of our profession has been shown in our generation more than in any other period of the world's history. In every center of population throughout the world, we have presented groups of medical men giving their whole time and all their energies to the investigation and perfection of methods not of cure but of prevention of disease. We can proudly state that ours is the only profession which, were the making of money its prime object, with open eyes and set purpose indulges in the suicidal policy of endeavoring consistently to reduce its means of sustenance. Our leading thinkers, our leading investigators, have before them the banishment from among us of the vast array of infectious diseases, and in their efforts have the loyal support of the whole profession. Thus in the body corporate of medical men, as in the body of each individual being, there is this constant war between opposing motives.

#### EVOLUTION OF MEDICAL IDEALS

Perhaps I have not been sufficiently following the biologic literature of the last few years, and what I am about to say is already a commonplace; but after a study of mendelian heredity I have wondered why no one has come prominently forward to demonstrate the why and wherefore of progressive evolution and its inevitability in the terms of dominant and recessive. So far as I can see, in every mating it is the positive acquirement or quality that is dominant; the defect or absence of the same that is recessive. Thus hairiness is apt to be dominant to smoothness or want of hairs; the presence of eye pigment to absence of pigment; with the result that if there be mating between the possessor of a dominant quality and a possessor of a recessive quality the offspring of the first generation all present the dominant quality. There it is, although not absolutely fixed; the recessive character is also present but latent; and if two of this generation mate the

chances are that the recessive quality will show itself, but only in the proportion of one to four. Three out of four will present the dominant, the added quality; in one of the three firmly fixed, in the other two with the recessive quality also present but latent. In this way, you see, the dominant quality, acting on the majority of individuals of the strain, gradually becomes predominant, and there is the greater likelihood that if some further positive feature be acquired this will fall to the lot of some member of the major class; and so as the ages progress the inevitable tendency is to a steady increment of properties—to, in short, progressive cumulative evolution.

So it is with all true progress: it is cumulative; it has to be. Two centuries ago, beyond certain crude ideas regarding disinfection, preventive medicine was almost non-existent. The function of the physician was only to cure. Then this added idea of prevention showed itself in some of the greater men of the profession and steadily with successive generations, being a positive acquirement, it is becoming more and more a fixed principle of the profession.

Whither is it leading us? To this, it seems to me: The time is on us when the physician must make his livelihood, not for the cure of the patient but for preserving him in health and preventing him from falling sick. There will always be with us what may be termed physiologic medicine, the caring for women in normal childbirth, for the very young and the very old; always traumatic medicine or surgery; always a certain not inconsiderable amount of family medicine—for Johnnie will indulge in green apples so long as there are Johnnies and apple-trees, and will suffer in consequence. Nay, more, I do not in the least imagine that we shall gain ascendancy over pathogenic bacteria as a body. I feel convinced that if we drive out such diseases as tuberculosis, typhoid and scarlet fever, we shall weaken the general bodily immunity. I think that we are realizing more and more that a man does not so much escape the ordinary infectious diseases because he has a strong inherited immunity, as because, by good fortune, he has time and again been exposed to mild subinfectious doses of the virus, and in neutralizing these has gained such immunity that later he is able to resist doses which would otherwise set up acute disease; and doing this that he raises not merely the specific but also the general resisting power of the organism.

If, therefore, we eradicate certain specific germs which to-day are widely spread, we are in danger of lowering the general resistance to disease; our bodies will not be so well educated to resist, and we shall be apt to succumb to microbes and diseases which in our present state are incapable of attacking us.

It follows that I imagine no Utopia from which infection will be banished; only a state of generally improved conditions of existence in which the exanthemas and the severer infections will be much reduced in their incidence, and the active curative work of the physician will be definitely reduced, the preventive work as definitely increased. Now, although the bacteriologist, detecting tubercle bacilli in the milk of a cow, by bringing about the compulsory slaughter of the beast prevents, it may be, a series of infants from succumbing to *tabes mesenterica*, that bacteriologist—virtuous as has been his action—cannot bill all the families of a particular milk-route for what he has saved them; cannot say to the parents, “The estimated value of your child’s life to you and to the community has been officially estimated at so much, the chance that it would become infected from this particular cow was such and such, wherefore you owe me so much.” The idea sounds absurd. But, as a matter of fact, the bacteriologist has accomplished all this, and if the individual cannot be asked to pay, it is for the community to show its appreciation. The more medicine becomes preventive, the more incumbent does it become on the community and the state, rather than on the individual, to subsidize the medical man.

I am no socialist, far from it. To me the doctrine that all men are born equal and are equal is as repugnant as it is manifestly false. How could we hope for progressive development, for the advance of our race, if all were at the same dead level; and if, notwithstanding the improvement in the individual, brought about by wise course of life in favorable surroundings, his offspring were after all only equal to that of the individual injured by unfavorable surroundings? The idea is unnatural, is contrary to the knowledge of evolution. It is on the face of it idiotic to maintain that the child born with the stigmata of congenital syphilis is equal to the child of sound parentage. That all be given, as far as possible, equal opportunities, that all be given a fair start, is quite another matter. If, therefore, I recognized a likelihood that the conversion of medicine into a public service would reduce all medical men to a common standard, no one would offer more active resistance. But I foresee that it means nothing of the kind. We are thus, I firmly believe, within measurable distance of the nationalization of the medical profession. I want you, gentlemen, to realize this, to face it clearly, and, what is more, to be prepared to help toward its accomplishment, living lives that will at once be a credit and a help to all our body. Such a momentous change should come from within the profession, not be forced on us from without.

I am not alone in this opinion; there are, I feel assured, others on this platform, members of your faculty, who are equally convinced that this has to come.

## EUROPEAN PROGRESS IN PUBLIC HEALTH WORK

For what are the signs of the times? We on this continent call ourselves progressive, and we are progressive, but in this matter the Old World is leading the way. It is in no sense derogatory to us of the New World if, busied with the vast task of settling and establishing a continent, older countries across the ocean with greater leisure are far beyond us in certain directions. We here, for example, are still in a medieval condition as regards our Public Health Service. Individual cities, like your own, may be striving valiantly to place health matters on a proper footing; but take the country as a whole, and what do we find? Instead of securing those who have expert training as municipal health officers and paying them well, your ordinary municipalities elect either the youngest and rawest practitioner in the district or the man who has been a failure in private practice, to whom the shamefully inadequate stipend doled out by a grudging municipality is better than nothing. With such incapable minor officials, the state board of health, however capable its higher officials, is constantly impeded in its efforts. Here Germany and England are far ahead. Take the British conditions, which I know best. There every municipality must have its trained health officer, possessing a diploma of public health of an accredited university, and those posts are so well paid that I know from experience that universities have difficulty in procuring the best men to fill their professional chairs in hygiene, because the stipends afforded by the largest cities and more populous counties are so high that the attractions the universities can afford are insufficient. There is thus developed in Great Britain a definite career in preventive and public medicine, which to-day is attracting to it scores of the brightest of our men—a public service with definite grades and opportunities for promotion, with office dependent on capacity, independent of local and party politics, with permanency of tenure and popular respect. Bumbledom, it is true, does not love it, but Bumbledom is forced to submit under fear of such pains and penalties that perforce it cleans up its house and its back yard and reduces its infantile and other mortality.

This, however, as doubtless you all know, has been put into the shade by the further developments of the last few months, marshalled by Lloyd George. It is difficult to arrive at a sober, disinterested opinion regarding Lloyd George, so strong is the feeling he has aroused one way or the other. It seems impossible for any Englishman to appreciate his correct measure. If one can arrive at any judgment from the parliamentary proceedings, say by studying the *Times*, there can be no doubt that those proceedings and the tone of public life in Great Britain have painfully deteriorated since he and his friend Winston Churchill have come to the fore. Doubtless, were I in the old country, with certain

innate conservative tendencies, I should cordially loathe him. Seen dispassionately from a distance, he appears to be that rarest of combinations, a ranting demagogue possessed of constructive powers. In establishing the eye and artisan insurance, he was, it is true, only following the lead of Germany, but his insurance against sickness has followed distinctly original lines. Briefly, he said that this payment on the part of or on behalf of the artisan and his family for insurance against sickness led to other obligations. If the government made itself responsible for payment for disability, it must provide the medical attendance, must see that the sick man or woman received due care according to a definite scale; and that this must be provided by the state. Thus to-day in Great Britain there is compulsory insurance against sickness and disability for all those whose earnings are below a certain amount, and in return the government provides medical attendance. The medical men in any district who accept the government terms become in this way servants of the state. The worker, male or female, is given the power of selecting his medical attendant from the panel, and having selected him he is paid by the government at the rate of something under two dollars per year per head. His interest, therefore, is to preserve the health of his clients—the less active sickness there is the better for him and for everybody. There are, I should add, special payments for drugs, maternity cases, tuberculosis, etc., which here I need not enter into.

So, after a sharp and very bitter campaign, medical conditions in Great Britain have been revolutionized. What must impress those who have followed the fight put up by the profession is that our brothers across the water were not opposed to the principle of Lloyd George's measure; on the contrary, they were ready to admit it. What aroused their fury was the way in which the bill was introduced; the way in which they, brought up to glory in their professional independence, were forced to convert themselves into public servants without so much as a polite "by your leave"; were told what should be the registration fee without consultation. To modify slightly an old saying, it was not what Lloyd George did, but the nasty way in which he did it. Wherefore, at first they refused to eat the Welshman's leek, but after it had been cut down somewhat and served in a more acceptable manner they eventually consumed it with fair grace. Now the measure has become law and matters are in process of adjustment. For example, the hospitals, both great and small, in Great Britain as here, have been established and are maintained by the voluntary contributions of the well-to-do. To-day, these supporters of the past are refusing further aid, on the ground that, as the rich are being heavily taxed by the government to meet the expenses of the new state of affairs, and as the government has made itself responsible for the sick

poor, it and not they must bear the cost of medical charities, and must either make the hospitals complete state institutions as in Germany, or must afford so much per diem for each patient treated in the wards and in the outpatient clinics. It is doubtful if the government will consent to "taxation without representation"; whether they will pay for hospital maintenance without having a controlling influence on the hospital board. They must, it would seem, eventually obtain this control, and the nationalization of the hospitals must be a matter of the near future.

See what this signifies. The leaders of the profession are on the staffs of the hospitals. Men who have their paying patients among the well-to-do have refused thus far to accept the government contract and enter the public service. These leading physicians and surgeons will find themselves in the position of either resigning their hospital posts (which, when one considers what hospital opportunities and hospital positions signify, appears to me to be the unlikely course), or of continuing to serve, but now as government officials.

#### THE IDEAL OF SERVICE IN MEDICAL PRACTICE

Surely, therefore, and by no means slowly, Great Britain is embarked on a course that can lead only to medicine becoming a state service, just as are the army and the navy. From what we know of our brothers across the ocean, we may be sure that they will proceed by compromise; that they will be practical rather than logical in their advance. For long there will exist side by side the state practitioners, paid largely by stipend, and the private practitioners, consultants, surgeons, and specialists, paid by fee; but as the public medical service grows in extent it will grow in importance and desirability. There will be grades in the service, with possibility of promotion; valuable hospital and administrative posts to be filled. Inevitably the status of the members of the government service will come to be regarded as superior to that of the private practitioners. Once the world and his wife recognizes this, there will be no further difficulty: the whole profession will lapse into public service. It will, indeed, be exactly as with the army and navy. Your general or admiral, even your colonel or your commander, does not take his place in society and is not esteemed according to his wealth, but according to his position as a servant of the nation.

For this, gentlemen, we must realize: The race for wealth to-day is not a race for dollars; nor, after a certain point is reached, not difficult of attainment, it is a race for what dollars will buy. It is eventually a race for social status. If we can secure this status by other more honorable—or less vulgar—means, it is well for us. It is best for us to rejoice in our work for the work's sake and that alone; but if not all are able to attain unto this standard

—and we must remember that ambition is healthy and laudable—then at least we do most good and least harm if, serving our fellows, we serve also the state, and develop a relative rank dependent on capacity and merit; comforted by the assurance that our work well done will bring us sufficient for our comfort, for the due education and maintenance of our family, and for our wife to meet the social enemy in the gate with due recognition. As medical men, what more ought we to need? There will be no socialistic dead level of sameness in such a future. Individual work and capacity will tell, though it will show itself mainly by position achieved and only secondarily by dollars.

This, it seems to me, is the future that lies open to us in this continent. It may be objected that here we have no Lloyd George and no workingman's insurance act to bring about the change. Quite so, but we have other influences. The development of an adequate and well-equipped public health service in every state of the Union is sure to come. And over a large part of the country, especially in the center and West, we have institutions whose influence undoubtedly is working toward the end I have indicated. I refer to the state universities and to the huge bonus which the states through these universities afford to the student who takes the six- or seven-year medical course. Even in institutions like your own, supported by private beneficence, I wonder if you realize that, while you pay what appears to be considerable fees, these fees represent only about half the cost of your education. The other half is a free gift to you from private individuals, and that not for your individual benefit but for the public good. This gift to the medical student, whether by the state or by the philanthropist, can mean only that the public recognizes that good medical attendance is a public need—aye, a public service. It is an indication that the community is prepared to go farther—to call to itself an army whose function is to save life, not to destroy.

So, gentlemen, it comes to this, that, despite all the present-day temptations to which I have referred, to-day and in the future as even in the past care must be not for ourselves but for our fellows. If we desire not so much an upper seat in the synagogue as a serene mind and self-respect as the greatest of worldly possessions, let us not trouble ourselves about money-making. With your training, all that is necessary will come to you—you need have no fear.

I happened a few hours ago to come across once more a short address which Rudyard Kipling delivered to the students at McGill University six years ago. I do not think I can conclude better than by quoting some of his words:

Money dominates everybody except the man who does not want money. You may meet that man in your farm, in your village, in your legislature. But be sure that, whenever and wherever you meet him, as soon as it comes to a direct issue between you, his little finger will be thicker than

your loin. You will go in fear of him; he will not go in fear of you. You will do what he wants; he will not do what you want. You will find that you have no weapon in your armory with which you can attack him; no argument with which you can appeal to him. Whatever you gain, he will gain more. . . . If your wealth is necessary for you, for purposes not your own, use your left hand to acquire it, but keep your right hand for your proper work in life.

Gentlemen, may you fare well in your life work.

---

## NECROLOGISTS'S REPORT, RUSH MEDICAL COLLEGE ALUMNI ASSOCIATION

YEAR ENDING JUNE 1, 1913

*Fellow Alumni:*—This year we have to record 74 deaths among our fellows occurring during the past twelve months, as against 68 during the previous twelve months, and 82 during the year preceding that.

Thus the average total remains nearly the same for the succeeding years. Yet, when we consider the ages at which they were called it does seem as though most of them were dealt with leniently and given a fair opportunity to gather in the harvest before the final summons.

Forty-nine, or two-thirds of our members, were over 60 years old and thirty of these were over 70. Eleven were under 50. The average age was 63 years. Senile debility with its nine victims, and cerebral hemorrhage with seven stand at the head of the list as the cause of nearly one-fourth of the deaths. There were but five deaths from pneumonia as compared with seven last year and ten the year before. An unusual number of deaths—eight—followed operations.

Following is the list of absent members with summaries:

### DEATHS

**Wm. A. Neal**, Elkhart, Ind., graduated 1857, member of Indiana State Medical Society, Surgeon of U. S. Volunteers during Civil War; died in the Clark Hospital, Sept. 25, 1912, from kidney disease, aged 77.

**Joseph T. Miller**, Urbana, Ill., graduated 1857, Surgeon of the Sixtieth Illinois Volunteer Infantry throughout the Civil War, died at the home of his son in Canton, Ohio, Nov. 12, 1912, from senile debility, aged 82.

**Geo. Washington Corey**, Sawtelle, Cal., graduated 1859, Surgeon of the Twelfth Missouri Cavalry during the Civil War; later division surgeon of the Union Pacific System at Cheyenne, Wyo.; died in the hospital of the Soldiers' Home, Sawtelle, Cal., April 2, 1912, from senile debility, aged 80.

**Jethro A. Hatch**, Victoria, Texas, graduated 1860, Surgeon in the Thirty-Sixth Illinois Volunteer Inf. during Civil War; member of Indiana legislature in 1872 and congressman in 1896. Died suddenly, Aug. 3, 1912,

while making a speech before the Victoria County Republican Convention, aged 75.

**Jas. Livingston Thompson**, Indianapolis, Ind., graduated 1860, emeritus professor of ophthalmology in the Indiana University of Medicine; a member of the A. M. A., Assistant Surgeon and Surgeon of Volunteers and finally medical director of the western district of Kentucky during the Civil War; an ophthalmologist well known throughout the Middle West; died from pneumonia Mar. 5, 1913, aged 80.

**Richard E. McVey**, Topeka, Kans., graduated 1861, member of Kansas Medical Society, died May 23, 1912.

**Sam'l M. Dunn**, Tarkio, Mo., graduated 1862, for many years a practitioner in Nodaway County, Mo., died at the home of his daughter in Tarkio, Nov. 10, 1912, of senile debility, aged 82.

**Wm. Rush Patton**, Charleston, Ill., graduated 1862, commissioned surgeon in the Civil War but did not enter into active service; first practiced at Palestine, Ill., and then at Charleston, where he lived continuously since 1865. His son, Dr. J. Allen Patton, graduated from Rush in 1890. Dr. Patton died at his home in Charleston, May 12, 1913, from cardiac embolism, aged 76.

**Thos. F. Montgomery**, Owensville, Ind., graduated 1863. For nearly half a century a practitioner of Gibson County, Ind. Died Feb. 21, 1913, aged 73.

**John Walker Collver**, Welland Port, Ontario, graduated 1864, died Aug. 20, 1912, of senile debility, aged 82.

**Wm. Manson**, Burlington, Kans., graduated 1864, died Oct. 13, 1912, aged 73.

**John M. Harrah**, Switz City, Ind., graduated 1865, member Indiana State Medical Association, died April 12, 1913, aged 73.

**Francis M. Hiett**, Red Oak, Ia., graduated 1865, died at the home of his son in Metaline Falls, Wash., Apr. 3, 1913, from carcinoma of the gall bladder, aged 73.

**Curtis T. Fenn**, Chicago, Ill., graduated 1866, member of Illinois State Medical Society, died Feb. 21, 1913, from senile debility, aged 79.

**John Guerin**, Chicago, Ill., graduated 1866. The oldest member of the Chicago Board of Education. For three years professor of natural sciences and mathematics in the University of St. Marys of the Lake, Chicago; city physician in 1871 and 1872, and for several years a member of the medical board of Cook County Hospital. Left for Cuba on a trip in quest of health, and died in a hotel in Memphis, Tenn., Jan. 2, 1913, from heart disease, aged 73.

**Wm. Louis Rabe**, Dwight, Ill., graduated 1866, member A. M. A., Illinois State Medical Society, and Livingston County Medical Society, died from pneumonia Jan. 13, 1913, aged 73.

**Miles P. Sigworth**, Anamosa, Iowa, graduated 1866, died Oct. 8, 1912, aged 74.

**Flavius Josephus Van Vorhis**, Indianapolis, Ind., graduated 1866. Asst. Surgeon of Volunteers during Civil War; a graduate in law in 1880 and a state senator from 1881 to 1883, a pioneer in health legislation, who drafted and secured the passage of the law creating the first state board of health. Died in the Methodist Episcopal Hospital in Indianapolis, three weeks after an operation for gall stones, Feb. 9, 1913, aged 72.

**Wm. T. Dongan**, Niles, Mich., graduated 1867, died Mar. 10, 1913, aged 74.

**John Owens Hughes**, Norwood Park, Ill., graduated 1867, veteran of the Civil War and a member of the Illinois State Medical Society, died suddenly while making a professional call, Feb. 5, 1913, from heart disease, aged 75.

**Benjamin Franklin Kierulff**, Los Angeles, Cal., graduated 1867, a surgeon in the Franco-Prussian War; surgeon of the Second Brigade, Iowa National Guards; died Jan. 4, 1913, from intestinal disease, aged 73.

**Francis G. Arter**, Chicago, Ill., graduated 1868, died Jan. 22, 1913, aged 74.

**Nelson Asath Drake**, Kansas City, Mo., graduated 1868, member A. M. A., a veteran of the Civil War, died at his home in Kansas City, Mo., Jan. 9, 1913, from nephritis, aged 70.

**Jas. McClure**, St. Louis, Mo., graduated 1868, member A. M. A., veteran of the Civil War; died at his brother's home in Vincennes, Ind., Mar. 14, 1913, aged 71.

**Charles E. Hogeboom**, Talucah, Ala., graduated 1869, died from pneumonia, Jan. 6, 1913, aged 66.

**Wm. C. Hoover**, Haddon Township, Vigo Co., Ind., graduated 1869, died from senile debility about Apr. 24, 1913, aged 83.

**David Humphrey McFarland**, Heyworth, Ill., graduated 1870, died May 6, 1912, aged 80.

**Henry M. Marvin**, Coloma, Mich., graduated 1870, died May 3, 1912, aged 80.

**Herbert Walter Morehouse**, Danville, Ill., graduated 1870, member A. M. A., Chief Surgeon and Physician of the Wabash Employees Railway Hospital Association for more than twenty years; died Dec. 19, 1912, from cancer of the esophagus, aged 68.

**Chas. E. Quire**, Lynnville, Iowa, graduated 1870, died May 25, 1912, aged 69.

**Hezekiah John Crumpton**, Piedmont, Cal., graduated 1871, member A. M. A.; went to California during the gold rush in 1849 and was for many years engaged in mining; vice-president of the Society of California Pioneers; died Apr. 8, 1913, from senile debility, aged 84.

**James Henry Hutchins**, Hampton, Iowa, graduated 1871. New York University, New York City, 1881; member of the Iowa State Medical Society and veteran of the Civil War; died June 23, 1912, from cerebral hemorrhage, aged 67.

**James A. Smith**, Norway, Iowa, graduated 1872, died Mar. 1, 1913.

**William Russell Lewis**, Oak Park, Ill., graduated 1874, member of the Illinois State Medical Society; died June 27, 1912, from heart disease, aged 64.

**Almon James Ryan**, York, Neb., graduated 1875, died May 13, 1913.

**Robert Willis Hoyt**, New Lisbon, Wis., graduated 1875, member of the State Medical Society of Wisconsin, died in St. Francis Hospital, La Crosse, after an operation for the removal of gall stones, July 16, 1912, aged 60.

**William Herbert Doolittle**, Woodstock, Ill., graduated 1876, member A. M. A. and Fox River Valley Medical Society, died June 10, 1912, aged 61.

**Royal Gray Hamilton**, Ochevedan, Iowa, graduated 1876, died Jan. 14, 1913, from senile debility, aged 84.

**Frank Seba Jones**, Medina, Ohio, graduated 1876, member A. M. A., died Dec. 18, 1912, from arteriosclerosis, aged 65.

**Macauley Arthur**, Middlesboro, Ky., graduated 1877, died Sept. 8, 1912, aged 62.

**Robert Dempsey Boyd**, Chicago, Ill., graduated 1878, died Jan. 9, 1913, from valvular heart disease, aged 67.

**John Augustus Logan**, Canton, Ill., graduated 1878; member of Illinois State Medical Society; veteran of the Civil War. Died at his office from heart disease, June 28, 1912, aged 65.

**John FitzHerbert Sugg**, Clinton, Iowa, graduated 1880; member A. M. A.; died Mar. 21, 1913, aged 66.

**James Valantine Cornish**, Quincy, Ill., graduated 1881, died in the Jacksonville State Hospital, June 16, 1912, aged 63.

**George Washington Nuckolls**, Minneapolis, Minn., graduated 1881, died Oct. 19, 1912, aged 69.

**Henry Francis Ballard**, Chenoa, Ill., graduated 1882, member A. M. A., died in St. Francis Hospital at Peoria, Ill., Feb. 7, 1913, two weeks after an operation for perforating ulcer of the stomach, aged 60.

**James Crozier**, Glenwood, Minn., graduated 1882, a veteran of the Fenian Raid in Canada in 1866; died about Feb. 27, 1913.

**Abraham Lincoln Fox**, Danville, Ill., graduated 1882, member A. M. A., died two days after an operation for nephritis, Nov. 28, 1912, aged 54.

**George Gordon Wilcox**, Seneca, Ill., graduated 1882, member A. M. A.; died about May 11, 1913, aged 63.

**Albert Frederick Hyde**, Columbus, Ohio, graduated 1882, member A. M. A., for 28 years a practitioner in Shelby, Ohio, died Oct. 23, 1912, from post melancholic dementia, aged 53.

**Henry Giles Anthony**, Chicago, Ill., graduated 1884, member A. M. A. In 1890 he was made assistant professor of skin and venereal diseases in his alma mater and professor of skin and venereal diseases in the Chicago Polyclinic. He was also physician to the Children's Memorial Hospital. He had suffered for several years from tuberculosis of the hip, and his death was due to a toxemia, complicating the tuberculosis. Died July 10, 1912, aged 52.

**William Dietrick Nelson**, Fulton Co., Ill., graduated 1884, died at the home of his daughter in Bryant, Ill., June 18, 1912, of senile debility, aged 87.

**John Mill France**, San Jacinto, Cal., graduated 1885, died in his office of cerebral hemorrhage, Dec. 14, 1912, aged 60.

**Archibald Coulahan**, De Witt, Mich., graduated 1887, member A. M. A., died in the City Hospital, Lansing, Mich., July 13, 1912, nearly four months after a surgical operation, aged 52.

**Jos. C. Pickard**, Chicago, Ill., graduated 1887, formerly a member A. M. A., died Oct. 31, 1912, from cerebral hemorrhage, aged 71.

**James Brigham Gaston**, Cripple Creek, Colo., graduated 1888, member Colorado State Medical Society; died in his office from cerebral hemorrhage Nov. 16, 1912, aged 61.

**Chas. Nelson Ballard**, Logansport, Ind., graduated 1890, member A. M. A., formerly of Chicago and associate professor of gynecology in the College of Physicians and Surgeons. Moved to Oklahoma City, Okla., four years ago; died in his old home in Logansport, Ind., Sept. 21, 1912, a short time after a surgical operation, aged 43.

**Henry Milton Ferguson**, Morris, Ill., graduated 1890, member of the A. M. A., and secretary of the Grundy County (Ill.) Medical Society; died Nov. 19, 1912, from rheumatism, aged 43.

**Louis Frank Lattan**, Detroit, Mich., graduated 1891, for twenty years a practitioner of Chicago, died Aug. 15, 1912, from pneumonia, aged 45.

**Joseph M. De Trana**, Chicago, Ill., graduated 1892, died in the Presbyterian Hospital, Feb. 11, 1913, from hemorrhage into the pons, aged 46.

**Loren Bisco Doxey**, Savannah, Tenn., graduated 1894; formerly of Columbus, Neb., and Washburn and Des Moines, Iowa; was found drowned in the Tennessee River, at Clifton, June 19, 1912, aged 53.

**Geo. Thomas Carson**, Chatsworth, Ill., graduated 1896, member A. M. A., died Apr. 26, 1913, of pneumonia, aged 52.

**Warren M. Hunter**, Chicago, Ill., graduated 1896, member Illinois State Medical Society; assistant professor of medicolegal pathology in his alma mater; for eight years physician of Cook County and for four years chief coroner's physician; died in the West Side Hospital, Sept. 4, 1912, aged 45.

**Augustine Perkins**, Denver, Colo., graduated 1896, died Sept. 10, 1912, from senile debility, aged 72.

**George H. Vaupell**, Chicago, Ill., graduated 1896, died suddenly at Antioch, Ill., from cerebral hemorrhage, aged 53.

**Paul Burton Blair**, Winona, Minn., graduated 1897, died in Rochester. (Minn.) State Hospital, Nov. 10, 1912.

**Lee Irvin Brownrigg**, Frederic, Wyo., graduated 1899, died about Oct. 26, 1912.

**William A. Beiringer**, Chicago, Ill., graduated 1900, member A. M. A., assistant to chair of laryngology in the Chicago Polyclinic, died June 3, 1912, aged 40.

**Geo. White McClure**, Springfield, Mo., graduated 1900, member A. M. A., formerly of Cartersville, Mo., died Feb. 17, 1913, from tuberculosis, aged 35.

**Thomas Henry McCarthy**, Madison, Wis., graduated 1901, member A. M. A., died suddenly Mar. 30, 1913, from cerebral hemorrhage, aged 37.

**Samuel Charles Emley**, Kansas City, Kans., graduated 1902, member A. M. A.; associate professor of pathology and bacteriology in the University of Kansas, who gave up teaching in 1909 to take charge of the Kansas state anti-tuberculosis campaign; was operated on for abdominal disease at Rochester, Minn., Aug. 10 and died at his home in Kansas City, Kans., Oct. 15, 1912, aged 37.

**Harry Francis Sloane**, Miami, Ariz., graduated 1904, was thrown from his buggy and kicked by his horse, dying from injuries a few hours later, Mar. 11, 1913, aged 37.

**Albert C. Shaw**, Eaton, Ohio, graduated 1908, died Jan. 11, 1913, of general tuberculosis following knee-joint disease, aged 45.

**Chas. Merchant Fargo**, Chicago, Ill., graduated 1912, interne in the House of Correction Hospital, died Nov. 26, 1912, from shock two days after an operation for hernia, aged 27.

#### ALPHABETICAL LIST

'12—Merchant Chas. Fargo, Chicago, Ill.....	Nov. 26, 1912, aged 27

## REPORT OF THE BULLETIN COMMITTEE

DR. R. MCP. LINNELL, '89

There have been published with the address list for correction six numbers of the BULLETIN. The committee would like to issue a better BULLETIN, but the demand has not been sufficient to warrant the publication of a more expensive edition. The endeavor has been to make it of interest to all, giving the alumni news as it comes to us, also publishing the minutes of the Alumni meetings, and keeping record of Alumni doings in various parts of the country. The special feature this year is the address book, which when completed, we hope to have as nearly correct as possible.

## CORRECTIONS AND CRITICISMS OF THE ADDRESS BOOK

The interest in the address book is shown by the large number of corrections already sent in. This response to our invitation is very gratifying. We have received corrections that were not available in any other way. We have included a list of the names of those who have sent in corrections; some of them have earned an address book and will get it. The time for sending in corrections has been extended to October 15th, because we want this list as nearly accurate as possible. Please send in any other corrections you may note to Dr. Fishbein.

This means we will not be able to get out the completed book until after October 15th, but we believe all will agree that this will be worth while. Send in all corrections at once and take advantage of this offer. Remember the corrected book will be sent free

to all those who have paid alumni dues or contributed to the Alumni Fund during the year, and to all who send in the first ten corrections of the Alumni list as stated in the offer in the last issue of the BULLETIN.

## NOTICE TO RUSH ALUMNI OF COOK COUNTY

### VERY SPECIAL

A get-together smoker with a hand out—"a stein on the table"—and the old songs, will be held at the Sherman House, Sept. 16th, at 9:00 p. m. This will be preliminary to a rouser, of all Rush men from everywhere, to be held in November during the Clinical Congress of Surgeons of North America. Note the time, Sept. 16, at 9:00 p. m. Note the place, Sherman House, and come without fail.

A. M. CORWIN, Pres.

## ORGANIZATION OF THE ALUMNI

Within a few days there has crystallized an enthusiasm which seems destined to make this the banner year for the Rush Medical College Alumni Association. When your class call comes, remember it is your duty to answer it. A live man has been elected as your secretary and you should give him all the support and aid in your power. Only by this means can we hope to make the Association such that its influence will be a propelling force for the best in medicine, for which Rush Alumni stand today. At our September meeting we want every Rush alumnus living in Cook County to be present. And we feel that when you see the "old bunch" all putting their shoulder to the wheel, you will step up also and "push for Rush." Only by solid organization of the individual units can the whole be made strong. Answer the call of your class.

The following men are acting as temporary secretaries. Get into communication with them:

- '13 Class Secretary.....Geo. Coleman, Presbyterian Hospital
- '12 Class Secretary.....Morris Fishbein, 535 N. Dearborn St.
- '11 Class Secretary.....E. C. Crumpton, Hyde Park Y. M. C. A.
- '10 Class Secretary....Robert C. Reimche, 3445 W. North Ave.
- '09 Class Secretary....Harry E. Bryant, 5490 Washington Ave.
- '08 Class Secretary.....W. W. Dicker, 420 North Park Ave.
- '07 Class Secretary.....Victor L. Schrager, 3300 Douglas Boul.
- '06 Class Secretary.....Harry E. Mock, 122 S. Michigan Ave.
- '05 Class Secretary.....Geo. Halperin, 3200 Douglas Boul.
- '04 Class Secretary.....Frank W. Allin, 4206 W. Monroe St.
- '03 Class Secretary.....John W. Viers, 4226 W. Harrison St.

'02	Class Secretary.....	Ralph C. Hamill, 15 E. Washington St.

### ADVERTISING NOTICE

In writing to advertisers say "I saw it in the BULLETIN." With sufficient advertising we should be able to issue a bigger and better BULLETIN. The advertising notices of sanitarium, laboratories, etc., conducted by Rush men are especially solicited. Our rates are for a full page \$20.00, for a half page \$12.00, for a quarter page \$6.00. The BULLETIN is now issued to more than 4,000 subscribers.

---

### DR. WILLIAM G. TODD, 1821-1913

With the death of Dr. William G. Todd on Aug. 7, 1913, the last student of the original class in Rush College has passed away. Dr. Todd came to Chicago with his parents in 1837. In 1842 he became a student in the office of Dr. Daniel Brainard, and when

Rush College was opened he became a member of the first class, in 1843-4. Dr. William Butterfield was his fellow student in Dr. Brainard's office, and was the only graduate in the first class from Rush. Dr. Todd did not graduate owing to interruption of his studies by sickness in his family. He soon drifted from medicine into manufacturing business, but he always retained a live interest in medicine and regretted that he had been led away from his first choice. He took much interest in all scientific matters, and especially in astronomy. He was very loyal to Rush and never tired of singing the praises of the early faculty. Dr. Todd was blessed with a cheerful disposition and an iron constitution, and his mental activities were quite perfect to within a few days of his death. With other of the early alumni he attended the alumni dinner of 1912. In the BULLETIN of April, 1911, an article written by him upon early medicine in Illinois and the founding of Rush Medical College was published. On his ninety-first birthday he presented to the library of Rush College a volume of Thacher's Medical Biographies of early American Physicians, a book published in 1828. It contains a photograph of Dr. Todd at the age of 90, and an inscription written by him.

---

### THE HOSPITAL \*

BY ARTHUR M. CORWIN, A.M., M.D.

President of the Alumni Association

In Ancient Rome a guest and host as well  
Was *hospes*, fragrant word, from which we get  
The modern terms hospice and hospital,  
To which the stranger goes with welcome met,  
And finds a refuge and a sure hotel  
For maladies that all mankind beset.  
"Hotel Dieu" in Paris by the Seine  
Is witness eloquent of what we say,  
The gods were mindful of our human pain  
Of yore, and still indeed they are today.  
Four thousand years B. C. the seeds were sown  
Of hospitals and schools of medicine,  
As told in hoary records writ on stone  
By Egypt's drifting desert sands shut in.

Then, all infirm and injured folk were laid  
For healing influence, divinely won,  
Beneath the sombre, kindly, cooling shade  
Of temples reared to Saturn, Coelus' son,

---

\* Dedicated to the New West Side Hospital, 1844 W. Harrison Street, Chicago, Ill., June, 1913.

Whose priests, more skilled in clinic art benign  
 Than common men, with learning more occult,  
 Bid ailing ones to come, their wills resign,  
 And eke their gold, and for their griefs consult.

For ills acute, and accidents that cry  
 Aloud for instant care, without delay,  
 To hospitals the ambulance must fly;  
 While chronic woes, of flesh and matter gray,  
 And poverty that is to sickness nigh,  
 Asylums seek, and wide prepared the way  
 To house of alms, the home of charity.

"Hotel Dieu," God's house, shall long abide—  
 We'll make the Galic sentiment our own,  
 Yet keep the label that we hold with pride,  
 On this fair house of brick and steel and stone.  
 For titles foreign-made we have no need,  
 But heaven-born truth and sentiment are free  
 To all mankind of various blood and creed,  
 And shall be so to all eternity.

To compass health full many a means we seek  
 Through herbs and minerals, and serums, too,  
 Aseptic tools and foods and drinks unique,  
 And laboratory tests, specifics new;  
 Empiric some, evolved by accident,  
 And some from painful labors, shall endure,  
 Of scientists who dared experiment,  
 Lord Lister, Jenner, Roentgen, Koch, Pasteur.  
 But one compounded remedy we know,  
 Though overlooked in therapeutic lore,—  
 A cheerful doctor, interne, nurse, will go  
 A long way toward effecting speedy cure  
 In every case. As this they understand  
 Our "powers that be" would promulgate this truth  
 Through all of us, to pass from hand to hand—  
 Not this, "An eye for an eye and tooth for tooth";  
 But wholesome, hopeful, kindly sentiment  
 Of each toward all, an attitude at length  
 Of helpfulness, a wish with shoulders bent  
 To lend another's load our virile strength.  
 Of fitness for the staff this is the test  
 Required of all, of doctor, interne, nurse.  
 Of skill there's none too good, we want the best;  
 But skill of head and hand will not 'imburse  
 For lack of heart more dear than all the rest.

The doctor and the nurse with records fine,  
 Upright and kind, well-versed in healing's art,  
 In hospitals of most approved design  
 And management—these are the chiefest part

Of Æsculapian practice up to date.  
 A combination such as this we build,  
 And, building thus, 'tis guaranteed by Fate  
 That all our rooms with patients shall be filled.  
 'Tis here that surgery of highest class  
 And diagnostic acumen shall live,  
 And specialists of noblest type shall mass  
 Their effort and their best endeavor give.  
 Our wards and private rooms, with sunshine filled  
 And freshest air, shall breathe an atmosphere  
 Of home. And food, prepared by those well skilled,  
 With cultured taste, shall add substantial cheer  
 To all our guests; yea, more—in every room  
 Fair optimism's smiling face and voice,  
 Inspiring hope, shall drive away dull gloom  
 And make each sober, heavy heart rejoice.

To sick men here we rear a monument—  
 No shaft of granite, gray, or slab of white  
 To mark the doleful spot where love's lament  
 Is sung in requiem to gath'ring night.  
 Memorial is this of nobler brand  
 Than tombs, within which lifeless dust endures;  
 For to the living here its walls shall stand  
 A monumental hall of famous cures.  
 The sick man! Who more worthy of our song?  
 In robust health, disdaining sympathy;  
 When ill, with vital functions acting wrong,  
 No infant more dependent than he.  
 Squandered his revenue of mental power,  
 Bankrupt in energy of body worse,  
 His neurons weak, his disposition sour,  
 His days a bore, his nights a living curse;  
 What wonder that the victim of disease  
 Should need some balm more practical than prayers  
 From racking pain to give him lasting ease;  
 More potent, too, than patent drugs and wares  
 Of advertising quacks, and passes made  
 By smooth magnetic fakes who fortunes tell  
 From skiagraphs of pocketbooks, X-rayed,  
 And guarantees to make their patients well?

But tho' such dangers make an easy prey  
 Of mortals ruled by pathologic fear,  
 A nobler God than Saturn guards their way,  
 A kinder hand than Saturn's priest's is near.  
 And so, to answer fair this need of men,  
 The West Side Hospital we build anew,  
 And fling its ample portals wide again,  
 And fling abroad a welcome message, too.

## BOOK REVIEW

THE COLLECTED WORKS OF CHRISTIAN FENGER. Published by W. B. Saunders Co., Philadelphia, 1912. In two volumes.

Following the death of the great surgeon, Christian Fenger, whose memory will be forever fresh in the minds of medical men because of his achievements, there was organized in Chicago the Fenger Memorial Association. The purpose of this association has been to aid the advancement of medical science and to establish a suitable memorial to the man in whose honor they were joined. No more suitable memorial could have been selected than is achieved in the publication of his collected works. Needless to say the work would have stood the test of time and the great majority of the articles would always have been available. However, in the two stately volumes of some 550 pages each have been gathered together practically everything written by Christian Fenger.

Of great interest is the autobiography printed in a previous number. Following this are his very early writings in Danish, which have been here for the first time published in English form. The article on carcinoma of the stomach, written as a dissertation for the doctor's degree, is of especial significance in that it offers for the first time a rational explanation of pain in this condition, namely, extension of the cancerous growth into the nerves. Moreover, there is given here an insight into the character of the writer, as the work is thorough, careful and discriminative, and shows with what detail even at this early stage in his career, the author was accustomed to study his subject. The bibliography to the date of printing is exceptionally complete.

An article concerning epizootic of horses, written in French, has not been translated. The articles following may be divided into three main heads to aid in their discussion. Perhaps most important of all are those regarding surgery of the kidney and urinary tract. In addition to all the shorter articles discussing individual cases of pathological nature are printed the article on diseases of the ureter, some 70 pages, which was published in the American Text-Book of Genito-Urinary Diseases, and on Surgery of the Kidney, some 50 pages, published first in the International Text-Book of Surgery. Both articles are well illustrated, have quite complete bibliographical discussion of previous important discussions of these subjects, and form an indispensable reference work to anyone interested particularly in this branch of surgery.

Next should be placed the various articles concerning surgery of the gall-bladder and bile ducts. Merely as history of the growth of this subject in this country they would be quite worth while, even if they did not contain a wealth of information concerning the pathology, anatomy and surgery of this condition. In addition to these two main divisions the author turned his attention at some time or other to practically every phase of surgery and to each he added something of interest or value. Even in instances where practically all that is given is report of cases, the mode of presentation is so orderly, so exact and explicit, and discloses so careful an observation, that much may be gained by their perusal.

The work has been edited by Prof. Ludvig Hektoen and bears the imprint of the devotion with which the pupil and friend regarded the great surgeon. Needless to say the book should have a place in the library of every surgeon and medical school. As a book of reference alone it will many times repay its value, and as a companion for leisure medical hours it may offer much that is interesting and instructive.

M. F.

## CORRECTIONS OF ADDRESS LIST

We want a good list of the Alumni. The Alumni themselves can help us to get it better than anyone else. Please send in your corrections at once. The new book will be ready during August.

# RUSH MEDICAL COLLEGE

In Affiliation with the  
**UNIVERSITY OF CHICAGO**

**CURRICULUM**—The fundamental branches (Anatomy, Physiology, Bacteriology, etc.) are taught in the Departments of Science at the Hull Biological Laboratories, University of Chicago. The courses of two (or three) clinical years are given in Rush Medical College and in the Presbyterian, the Cook County, the Children's Memorial, the Hospital for Destitute Crippled Children, and other Hospitals.

**HOSPITAL YEAR**—A fifth year, consisting of service as an interne under supervision in an approved hospital, or of advanced work in one of the departments, leads to the degree of M.D., *cum laude*.

**SUMMER QUARTER**—The college year is divided into four quarters, three of which constitute an annual session. The summer quarter, in the climate of Chicago, is advantageous for work.

**ELECTIVE SYSTEM**—A considerable freedom of choice of courses and instructors is open to the student. This is not designed, however, to encourage the student to fit himself for any special line of practice, but for its pedagogic advantage.

**GRADUATE COURSES**—Advanced and research courses are offered in all departments. Students by attending summer quarters and prolonging their residence at the University of Chicago in advanced work may secure the degree of A.M., S.M. or Ph.D. from the University.

**PRIZE SCHOLARSHIP**—Six prize scholarships—three in the first two years and three in the last two (clinical) years—are awarded to college graduates for these embodying original research.

## CALENDER OF RUSH MEDICAL COLLEGE

### 1913

June 16, Monday—The Summer Quarter begins.  
July 1, Tuesday—The fiscal Year of the College begins.  
July 4, Friday—Independence Day; a holiday.  
July 24, Thursday—Second Term, Summer Quarter begins.  
Aug. 29, 30, Friday, Saturday—Quarterly Examinations.  
Aug. 30, Saturday—Summer Quarter ends.

Aug. 31-Sept. 30—Summer Recess.

## THE RUSH MEDICAL ALUMNI ENDOWMENT FUND— ITS PLAN AND PURPOSE

1. A permanent trust fund raised by the voluntary contributions of the Alumni of Rush Medical College and their friends.

2. This fund shall be held in trust and advantageously and safely invested by the trustees of Rush Medical College, or other trustees chosen by the officers of the Association, for the sole use of, for and by the Alumni Association of Rush Medical College.

3. The principal shall be held intact and the interest shall be turned over annually to the officers of the Association on presentation to the trustees of vouchers signed by the treasurer and countersigned by the president of the Alumni Association.

4. The income from the fund may be used for any of the following purposes:

The promotion of wider acquaintance and fellowship among all graduates of the college; fostering the spirit of fraternity and alumni loyalty by smokers and dinners at the meetings of national, state, county and district societies, as well as through organized effort to provide welcome and extend courtesy to our fellow alumni returning to Chicago on occasion, and especially at commencement time; the maintenance of a strong, live alumni bulletin; for the interchange of class and state alumni news and the publication of college and graduate matters which are of special interest to this scattered body of men who have no other means of keeping in touch; the maintenance of one or more fellowships for scientific and practical research. The prosecution of such other plans as from time to time the officers may unite on for the benefit of this great alumni body individually and collectively.

5. The officers and committee chairmen shall make full report of the year's work in writing, submitted at the annual meeting in June. The trustees, through the treasurer, shall likewise make report of the status of the fund, and the treasurer shall render itemized account of all expenditures and reserves.

6. All such reports, together with that of the auditors, appointed at the annual meeting, shall be published in the next issue of THE BULLETIN succeeding that meeting.

7. No salary or premium shall be paid to any officer of the Association from this fund.

8. Expenditures from the interest of this fund shall be made only on approval of the majority of the officers.

## COOK COUNTY ALUMNI MEETING AT THE SHERMAN HOUSE, SEPT. 16, 1913

A very enthusiastic meeting of the alumni residing in Cook County was held at the Sherman House on the above date. Over one hundred members were present. President Corwin announced the purpose of the meeting and many others took part in the discussion. The speakers were practically unanimously in favor of an endowment fund for our organization, and many present pledged individual sums toward its attainment.

Dr. Rudolph Holmes moved that a concrete statement of the character and uses of the fund be prepared and presented to the association at our November meeting. This was seconded and carried.

Dr. Dodson moved that this group of Chicago alumni heartily approves the project of the alumni to establish a fund of \$30,000 to \$40,000 for such uses as the alumni themselves shall from time to time desire. This was seconded and carried.

After enjoying a buffet lunch and cigars, Dr. Corwin opened the financial campaign by calling the roster of classes present and asking for individual and class pledges. The responses were gratifying. Many made individual pledges of definite amounts, while others took the matter under consideration with the intention of making it a class affair.

The following individual pledges were received:

John Ritter, Class 1880.....	\$ 25.00
E. A. Boas, Class 1884.....	100.00
J. J. Stoll, Class 1885.....	50.00
L. B. Hayman, Class 1886.....	30.00
E. A. Gray, Class 1887.....	25.00
H. Barnard, Class 1889.....	20.00
(With privilege to increase.)	
Chas. A. Parker, Class 1891.....	25.00
Geo. M. Glaser, Class 1892.....	50.00
Oliver S. Ormsby, Class 1895.....	100.00
A. A. Whammond, Class 1896.....	25.00
B. H. Breakstone, Class 1899.....	25.00
Rob't Herbst, Class 1900.....	50.00
Mark M. Goldstein, Class 1900.....	50.00
Max Thorek, Class 1904.....	25.00
F. F. Kitzing, Class 1905.....	25.00
Morris Fishbein, Class 1912.....	25.00
Henry Kleinpell, Class 1900 .....	35.00
C. P. Caldwell, Class 1877.....	50.00
Total .....	<u>\$735.00</u>

Besides these individual pledges the following conditional and class pledges were made:

S. Eisenstadt, Class 1890, to give as much as any other single member in his class and to aid in collecting from other members of his class.

A. D. Lowell, Class 1899, desires time until November meeting before pledging.

Jos. R. Hawley, Class 1885, to collect fund from class.

Geo. M. Glaser, Class 1892, pledged \$50.00 individually, and to see other members of class.

A. A. Whammond, Class 1896, pledged \$25.00 individually, and to "stir up class of '96."

E. E. McEwen, Class 1897, to report later for class of '97.

M. M. Goldstein, Class 1900, pledged \$50 individually, and that class of 1900 would give \$5 more than any class coming later.

Fred Fisher, Class 1901, to report in November.

H. G. Vaughn, Class 1901, to report in November.

E. C. Greenebaum, Class 1902, with class pledge \$100.

Class 1903 pledged \$250 by members in Cook County.

Max Thorek, Class 1904, pledged \$25 individually, and to collect more from class.

F. F. Kitzing, Class 1905, pledged \$25 individually, and to see class.

Harry Mock, Class 1906, pledged \$300 for class.

Evarts Graham, Class 1907, to estimate later.

Morris Fishbein, Class 1912, pledged \$25 individually, and to see class.

Dr. Breakstone moved that a committee of five be appointed by the chair to be known as the Rush Committee on the Clinical Congress to look out for the interests of the Rush Alumni attending the meeting. Seconded and carried.

Dr. Lowell was appointed by the president to select two other members to form a committee to communicate with the A. M. A. regarding the proper design for a combined A. M. A. and alumni pin.

Meeting adjourned.

---

## SMOKER OF COOK COUNTY ALUMNI OF RUSH MEDICAL COLLEGE, HOTEL SHERMAN

OPENING REMARKS BY THE PRESIDENT  
DR. A. M. CORWIN

*Fellow Smokers and Smokeless Fellows:*—This is the first get-together meeting of the Cook County Alumni within our memory, and all of us are equally guilty in overlooking a good thing. But whatever has not been done by us that should have been done is no

"goterion to cry by" in resolving and carrying out what may and should be done now and in the future.

It has finally dawned on many of us that 600 men living within this great city and its suburbs and bearing the same institutional brand, have enough in common and enough importance to form a strong, live combination as a nucleus of a greater organization of five or six thousand Rush men all over the country to boost for the things Rush men stand for, and so advance the interests of the whole body and of the college that gave them professional birth.

As you talk to Alumni about the college, as I have taken occasion to do of late, every now and then some one of them will say in effect: "To hell with Rush, she has never shown any interest in me since I graduated and has never done anything for me. I would not be known there if I returned. I am not wanted there. Why should I attend her functions or contribute to her purse?" But if you will diplomatically scratch through this crust of apparent indifference, or even hostility, you find definite traces of fraternal feeling for Rush men, mitotic, germinal centers waiting to be irritated into healthy growth and activity. Class pride crops out stimulated by reminiscence, curiosity as to how the other fellow is doing who sat alongside him on the benches, a certain involuntary desire to swap experiences with him is lively, a certain regard for this or that instructor—what Alumnus does not love Walter Haines?—a certain appreciation of the traditions of the college. A little finesse in conversation will discover these things in that type of graduate.

Here and there, too, are men—a very few—who are personally disgruntled about some thing real or fancied; some ambition has been thwarted; some cherished hope crushed or pride hurt. They do not want anything to do with anything that sounds like Rush. These individuals are negligible quantities, greatly to be pitied, I think. For no man with a sore toe or chronic grouch can be wholly happy—a grouch is a barnacle on the hull of usefulness. If you have one, scrape it off and get under way at your proper speed, unhandicapped.

A third group are not greatly interested in the college itself, chiefly perhaps because they have never put nose into it since graduation. But the mention of class or alumni matters arouses more or less enthusiasm. For them there is hope.

And, then, there is that large number of men to whom any mention of college affairs or its people brings quick response. To this class belongs this splendid turnout here to-night.

It matters not with what other institution we may be or become affiliated as active faculty men, loyal to the work we have in hand and to our associates, the heritages of Rush are a part of us; her label is on our public careers; her spirit in our blood; her success a matter of selfish honor, if not of unselfish pride; her high standing is a thing to reflect credit on us, of whatever year our birth.

With this mental attitude, your officers of this year are unanimous in the feeling that this great body of men, great in number, great in quality, big in influence, should have a dignified treasury of a perennial sort, into which they and the officers to follow can reach honest and effective hands in doing the work which a big body of big men can do in a big way, as it should be done.

If this work is the extending of fraternity among Rush men at national, state, county and district meets; the strengthening of organization; the suitable entertainment of home-comers at commencement or otherwise; the running of an effective newsy BULLETIN; the support of Alumni Fellowships for the benefit of all through such work as that of Rosenow and others—whatever we want to do that should be done, it is but decent that we have a certain adequate perpetual treasury. To this end, at the splendid dinner of 150 Rush men at the Minneapolis session of the American Medical Association, the proposition of raising an endowment fund for the Rush Alumni Association was outlined, as in a former issue of THE BULLETIN and received with interest, Dr. Norman Bridge giving the first \$1,000. The goal set for this year's effort is the collecting of at least \$30,000 for the purpose. This at 5 per cent. interest will yield an annual revenue of \$1,500, and as the years come and go other classes will surely add their share and make good an increasing benefit to future generations of Rush graduates after you and I are dead, but not forgotten, for the share we have had in worthy endeavor.

---

### COMMENT ON THE NEW ALUMNI ORGANIZATION

Those of the faculty who have been interviewed on this new project have expressed themselves as heartily with the movement. We were fortunate in seeing Dr. Haines and Dr. Hektoen, together, and have the following signed statement from them:

"We join in expressing our hearty sympathy with the efforts to establish an Alumni fund as outlined in this BULLETIN."

LUDVIG HEKTOEN,  
WALTER S. HAINES.

---

### REUNION OF '89 CLASS

A preliminary meeting to arrange for the celebration of the 25th anniversary of the *Rush Class of '89* was held Tuesday, October 7, at which part of the officers elected five years ago and some of the resident alumni were present. It was decided to devote the day to clinics at Old Rush and have a rousing get-together banquet in the evening, such celebration to be held on our 25th anniversary, *February 19, 1914*. We want every living member of

the class to be present if possible. We ask every man to constitute himself a committee of one to *rouse himself* and his nearest or dearest classmate and we want you to answer promptly giving us your correct address and supplying us with any information regarding those whose names are below and concerning whom we have been unable to learn. We are out to have a live and rousing time and to show that the Class of '89 are still youngsters. We must have the cooperation of every member of the class.

*Answer this letter at once* and give us any suggestions, as we are going to make this 25th year a never-to-be-forgotten one.

Get together for Old Rush. You men of '89 reply.

H. A. TYLER, Chairman,  
108 N. State St., Chicago.

GEO. F. BUTLER,

A. W. BAER,

J. R. MINAHAN,

J. Z. BERGERON,

Executive Committee.

H. A. ROBINSON, President.

E. P. RICE, Treasurer.

ALFRED C. COTTON, A.M., M.D.

PEDIATRICIAN AND MAN FOUR-SQUARE

BY

ARTHUR M. CORWIN, A.M., M.D.\*

Good Sir, and Master of this gracious hour,  
And all ye goodly sirs, both lean and fat,  
Who count a friend of greater worth

---

\* Recited at a dinner given in Dr. Cotton's honor by 250 of his conferères in Chicago Medical Society, at the Hotel Sherman, Sept. 25, 1913.

Than name of oligarch or democrat,  
 And who delight to show esteem to this,  
 The Nestor of them all in matters infantile;  
 Give heed, I pray, to these my verses blank,  
 For ordinary prose may not express the thought,  
 And rhymes with cautious, halting feet  
 Are all too slow.

'Tis given to womankind  
 To draw mere man with silken thread of charm  
 Of mind and heart and fascinating form and face,  
 And bind him with a golden grace of manner sweet,  
 With thrilling touch of lip and soft embrace;  
 Her voice like call of mermaid  
 From an emerald beckoning wave  
 Encaptivates him in its liquid depths,  
 And if he struggle from its thrall,  
 'Tis vain, her soulful eye has shot its conquering shaft;  
 His virile strength is all her own;  
 In servitude he bows, her willing slave.

And yet not all her slave,  
 For as to Jonathan a David slave,  
 And Damon to his Pythias,  
 The brotherhood twixt stalwart men  
 Was born of old, divinely chemical,—  
 Fraternal atoms they  
 Of that primeval plastic clay  
 From which they sprang,  
 In sworn allegiance through a common origin;  
 'Tis thus these atoms men cohere  
 To make fair friendship's molecule  
 A most coherent stuff.

But as the potter molds from out the mass  
 Some fairer shape  
 In skillful likeness of a thing divine,  
 So differ men, and differ too  
 In quality of their ancestral mud;  
 Thereby we humans masculine  
 In recognition of a bit of finer stuff,  
 Though one of us,  
 Rejoice to bring spontaneous offering  
 Of soul and brawn to Cotton  
 Long our friend, our councilor,  
 And yet our critic just.

'Tis our's to laud the *Virtues* rare of this our friend,  
 His *faults* forget, —  
 What artist would with sooty brush.  
 Bedaub the beauties of a sunset sky?  
 Nor measure we with fulsome flattery  
 His merits fine:  
 No honor that to him or us  
 And naught to satisfy.  
 'Tis mete the rather with an eagle's quill,  
 Symbolic of the strength of love we feel,  
 To write indelibly and plain  
 The happy truths we know of him.

What though of human foibles  
 He may have his share;  
 If they who do no sin shall claim  
 Alone the right to cast a stone at him,  
 No shower of rock shall fall his way,  
 As none of yore.  
 Of faults he has a few,  
 Some grave, perhaps, why not?  
 So have we all.  
 We love him for abundant grain of character,  
 A priceless store,  
 And reckon not of chaff.

A born physician, he,  
 For whom, though men and women look  
 To cure their ills,  
 Especially do infants weep  
 In time of pain and fear.  
 The voices of ten thousand of these little ones,  
 He's seen and saved,  
 I seem to hear in mighty chorus to his praise,  
 From out the tangle of the sleepless nights  
 And weary days he's served;—  
 The children love him so  
 As follow fast his trail their flying feet,  
 Where'er the trumpet of his auto loud they hear,  
 So followed children long ago that other piper dear.

The corridors of suffering  
 Long years he's paced,  
 To bless with reassuring smile and healing touch;  
 For decades faced the student's serried ranks  
 Dispensing truth;  
 And long by pen and voice  
 Made records sure.

Wide in his knowledge of the crowd,  
 Of books as well;  
 Big in experience, manifold;  
 Broad in his sympathy for every living thing;  
 Keen for the right when hostile wrong obtrudes;  
 A fearless, able advocate where principle's at stake;  
 His word is sacred more than any bond.  
 Wise in advice, in judgment just;  
 Quick to detect a sophistry;  
 When called extempore to reason on his feet,  
 What scion of the law could hope to meet  
 On equal field the thrust and parry  
 Of his subtle wit?  
 Generous to foe, in sacrifice for friend in need,  
 He'll launch his craft on any sea,  
 And plunge through any storm  
 Nor care what dangers threaten him.

In fine, with sunny heart and face benign,  
 A wondrous fund of illustrative anecdote at ready call,  
 And bubbling, kindly humor, rich with all,  
 He stands unshaken in his faith in God and man,  
 Three score and six, an optimist.  
 A loving, loyal, forceful gentleman.

# CLINICS BY ALUMNI OF RUSH MEDICAL COLLEGE

The following schedule of clinics to be given by Rush Alumni in Chicago during the session of the Clinical Congress of Surgeons of North America, from November 10 to 15, inclusive, has been arranged by the special Rush Alumni Committee on Clinics appointed at the recent smoker: Dr. Benjamin Breakstone, chairman; Frederick Tice, Charles Wade.

Class	Name and Specialty	Institution	Days	Hours
'67	Bachelle, C. V., Gynecology and Obstetrics	Polyclinic Hospital.....	Thursday.	1 to 4 p. m.
'71	Ingals, E. F., Nose and Throat....	Presbyterian Hospital.	Friday .....	4 to 6 p. m.
'78	Belfield, W. T., Genito-Urinary....	Rush Medical College.....	Tuesday and Friday...	4 to 5 p. m.
'79	Freer, Otto T., Nose and Throat..	Polyclinic Hospital.....	Wednesday .....	2 to 4 p. m.
'79	Murphy, John B., Surgery.....	Maimonides Hospital.....	Wed. and Sat.....	8:30 to 12 m.
'80	Brophy, Trueman W., Oral Surgery	Mercy Hospital.....	Thursday .....	2 p. m.
'82	Carey, Frank, Gynecology and Obstetrics	Presbyterian Hospital.....	Thursday .....	2 to 5 p. m.
'82	Harris, M. L., Surgery.....	Francis Willard Hospital.....	Tuesday .....	
'83	Bevan, Arthur D., Surgery.....	Michael Reese Hospital.		
'83	Wescott, Cassius D., Eye.....	St. Lukes Hospital.	Monday and Thursday..	11 a. m.
'84	Goldspohn, Albert, Gynecology and Obstetrics	Polyclinic Hospital.....	Monday and Thursday..	11 a. m. to 1 p. m.
'85	Conley, T. J., Surgery.....	Presbyterian Hospital.....	Monday and Thursday..	
'86	Gamble, Wm. E., Eye.....	St. Lukes Hospital.	Tuesday and Friday...	11 a. m.
'86	Ochsner, A. J., Surgery.....	Post Graduate Hospital.....		
'86	Rhodes, John E., Nose and Throat.	West Side Hospital.....	Monday and Friday....	10:00 a. m. to 12 m.
		University Hospital.		
		College of Physicians and Surgeons.	Thursday .....	1 to 3 p. m.
		Augustana Hospital.....	Mon., Wed. and Fri....	8 a. m. to 1 p. m.
		Home for Dest. Crip. Children.....	Wednesday .....	8 a. m.
		Rush Medical College.....	Wednesday .....	2 to 4 p. m.

Class	Name and Specialty	Institution	Days	Hours
'87	Fuller, Wm., Surgery.....	College of Physicians and Surgeons. Wesley Hospital.	Wednesday .....	1 to 3 p. m.
'87	Reed, Chas. B., Gynecology and Obstetrics

## CLINICS AT RUSH MEDICAL COLLEGE

## MONDAY

- 9 to 11—Dr. Billings: General Medicine. Dr. Bassoe: Nervous Diseases.  
 9:30—Dental Surgery, Dr. F. B. Moorehead.  
 11 to 1—Dr. Bevan: Surgery.  
 2 to 3—Pathological Laboratory, Orthopedic Clinic. Eye, Ear, Nose and Throat Dispensary.  
 3 to 4—Dr. Wilder: Ophthalmological clinic.  
 4 to 6—Operative Surgery.

## TUESDAY

- 9 to 11—Dr. J. B. Herrick: Medical clinic. Dr. Dodson: Pediatric clinic.  
 11 to 1—Dean D. Lewis: Surgery clinic.  
 2 to 4—Dr. Ormsby: Skin clinic.

## WEDNESDAY

- 9 to 11—Dr. Sippy: Medical clinic.  
 11 to 1—Dr. Webster: Gynecological clinic.  
 2 to 4—Dr. Rhodes: Nose and Throat clinic.

## THURSDAY

- 9 to 11—Dr. Billings: Medical clinic. Dr. Hall: Nervous disease clinic at Cook County Hospital.  
 11 to 1—Dr. Bevan: Surgery clinic.  
 2 to 4—Pathological laboratory.  
 3 to 4—Dr. Wilder: Ophthalmological clinic.  
 4 to 6—Dr. Kuh: At Cook County Hospital, Nervous Disease clinic.

## FRIDAY

- 9 to 11—Dr. Herrick: Medical clinic.  
 11 to 1—Dr. Bevan: Surgery clinic.  
 2 to 4—Dr. Ormsby: Skin Disease clinic.  
 4 to 6—Genito-Urinary Dispensary.

## SATURDAY

- 9 to 11—Dr. Sippy: Medical Clinic.  
 11 to 1—Dr. Webster: Gynecological clinic.  
 2 to 3—Post-mortem examinations: Cook County Hospital Morgue.  
 4 to 6—General Urinary Dispensary.

Dispensaries are continuously open during the day, the work being conducted at the following hours:

- 9 to 11—General Medicine, Pediatrics, Nervous Diseases.  
 11 to 1—Surgery and Gynecology.  
 2 to 4—Eye, Ear, Nose, Throat and Skin.  
 4 to 6—Genito-Urinary.

Work is conducted in the pathological laboratory daily from 2 to 4. Classes in laboratory diagnosis will be held from 9 to 11; in physical diagnosis from 8 to 9.

- 9 to 11—Daily Medical Dispensary Clinics.  
 11 to 1—Daily Surgery Dispensary Clinics and Gynecology.

---

Notice Sherman House meeting.  
 The gang will be there.

## A LITANY FOR DOCTORS

From too few patients and from too many patients; from hypodermic syringes that won't work; from book agents; from consultants who steal our cases; from rheumatism; from collecting agencies; from stupid nurses; from people who are going to pay for a visit next Saturday night; from Antikammia calendars; from tire troubles and Christian Scientists—good Lord, deliver us.

From the people who begin their letters to us, "Dear Sir"; from static machines in damp weather; from boils on the back of the neck; from debts and detail men; from Pa-pay-ans Bell blotters; from antivivisectionists; from nurses who know more than we do; from "cures" for tuberculosis; from "text-book" papers; from incurable cases of imaginary disease; from Bernard McFaddists; from tag days; from new methods of administering salvarsan; from "automobile" fractures; from infant foods; from antivaccinationists; from nature curers; from Immanuel Movers and the *Spirochaeta pallida*—good Lord, deliver us.

From the people who call us "Doc"; from malpractice suits and dead beats; from gossips; from overly grateful female patients; from pretty nurses and jealous wives; from the doctor who succeeds us in a case; from the "wrong number" mistake; from consultations by telephone; from the counter-prescribing druggist; from lawyers and dentists; from samples of Sal Hepatica; from the man who wants us to help his lady friend out of trouble; from calls at 2 a. m.; from shoulder presentations; from optometrists and engine trouble; from the man who "cannot add anything to the paper, but merely wants to compliment the essayist"; from metaamidophenylparamethoxychinolin; from New Thoughts and mining stocks; from breaking catgut; from neurasthenics; from "the sponge we left behind us," and from the dangers of tricresol 0.4 per cent.—good Lord, deliver us. Amen.—R. R. in *Lancet-Clinic*.

---

ALUMNI ADDRESS BOOK

The alumni address book is now undergoing final revision and will be mailed within a month. Be sure you get one by having your dues paid. If you get the pink slip with the BULLETIN your dues have not been paid.

# SPECIAL NOTICE TO RUSH ALUMNI

The Clinical Congress of Surgeons of North America which meets in Chicago from November 10th to the 15th inclusive, will bring many thousands of physicians to this city, as the program for their entertainment and professional benefit has been arranged upon a tremendous scale both as to number of clinics, ability of operators and the field covered by their work. A schedule of Rush men holding clinics is published elsewhere in this Bulletin. Cook County men, especially Rush men, should lay their plans to attend these clinics as well as the evening sessions for presentation of papers and discussion.

*Thursday Evening, November Thirteen*

## *A Rush Medical Dinner*

*at the*

*Hotel Sherman*

*Five-thirty O'clock*

*Dinner Served Sharp at Six O'clock*

*Price \$2.00*

*Informal*

Mark the date and time on your cuff. Cut out that fascinating evening office hour for this once and come to this semi-annual "get together" of Rush men. Communicate with the fellows of your class in Cook County and boost this good thing.

A prize will be given to the class having the largest number present. Say, this will be some occasion. There will be a lot of Rush Graduates back to attend this Congress and present at this dinner. Let Cook County Rush men turn out in force and give them the glad hand and a warm welcome. The men of your class will be looking for you. Do not disappoint them. The faculty will be there, of course, as a part of the Alumni body. Keep your vocal cords in tune. They will be needed.

Sincerely,

ARTHUR M. CORWIN, President

*If you wish to reserve ticket for the banquet notify Dr. A. M. Corwin, 15 E. Washington St. or Dr. Jno. Ritter.*

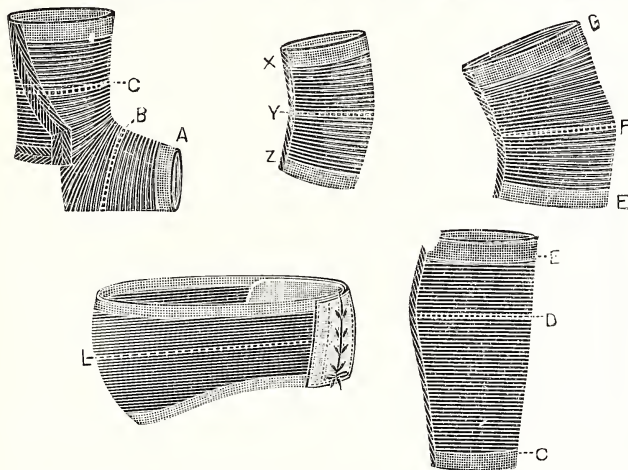

THE HOTEL SHERMAN, Chicago, Cor. Clark and Randolph, is headquarters for *Rush Alumni* during the Clinical Congress—secure your reservation for rooms without delay.

# The Latest in Surgical Elastic Appliances.

## WOLASTIC

(Trade Mark)

### New Fabric Wool and Rubber

It is made of gray wool interwoven with a covered rubber thread. The Abdominal Supporter is exceedingly beneficial for protection, support and warmth, as well as reducing obesity, and non-interference with breathing. The Anklets, Knee Caps, Leggings and Elbow Caps are not only a great advantage for warmth and support, but often a wonderful relief for rheumatism in the joints.

In ordering the above articles give circumference at letters marked on cuts.

The Abdominal Supporters are **\$2.50** with an additional cost for the extra large sizes. The other pieces are all **\$1.50** unless extra large, which would be an additional cost.

# WASSERMANN TEST

In every complement-fixation test for syphilis made in our laboratory we employ both the original Wassermann sheep-hemolytic system and the Noguchi human-hemolytic system. In this way we are able more accurately to control our results, so that our reports have a greatly increased value over those for which the single system is used. Our fee for this test is \$10.00.

<b>Complement-Fixation Test for Gonorrhea</b>	- - -	<b>\$10.00</b>
<b>Abderhalden's Sero-Diagnosis of Pregnancy</b>	- - -	<b>10.00</b>
<b>Abderhalden's Sero-Diagnosis of Cancer</b>	- - -	<b>10.00</b>
<b>Lange's Colloidal-Gold Test of Spinal Fluid</b>	- - -	<b>10.00</b>
<b>Autogenous Vaccines have been Reduced to</b>	- - -	<b>5.00</b>

These auto Vaccines are put up in 20 c.c. sterile containers, which are specially designed to prevent contamination, or in 1 c.c. ampules, as you may direct.

**Stock Vaccines, \$3.00 per dozen Ampules, or \$2.50 per 10 c.c. Special Container.**

We are prepared to perform all types of laboratory examinations for diagnostic purposes, and can assure you accuracy and efficiency from our staff of experienced workers in this field.

Fee tables for all examinations and full directions for forwarding various specimens on request. Containers and culture media furnished.

## CHICAGO LABORATORY

Established in 1904

## NEW YEAR'S GREETING

---

WHAT HO! ANOTHER HOLIDAY.  
THE NEW YEAR'S OPENING:  
TO SET THE PACE IN HAPPINESS  
FOR ALL THE OTHER DAYS  
THAT CROWD THE CALENDER  
THE NEW YEAR'S DAY WAS MADE;  
FOR WHEN IN BLACKEST NIGHT WITH RULE OF DEATH,  
UNLICENSED CHAOS REIGNED  
AND HOPE OF LIFE WAS BUT A GERMLESS THING,  
THE EARTH A FORMLESS VOID,  
THE GREAT GOD TOUCHED THE RIM OF SPACE  
AND FORMED THAT WONDROUS FAMOUS DAY,  
THE FIRST, THAT DAY OF LIGHT;  
AND STRAIGHTWAY LIFE AND LOVE AND JOY  
CAME TROUPING ON WITH MAN.  
AS, WHEN THE WORLD HAD LEARNED TO SPEAK  
IN MEMORY OF THAT FIRST ILLUSTRIOUS DAY,  
IT CALLED ALOUD TO CELEBRATE IN HAPPINESS  
THE DAWN OF EACH YEAR, NEW;  
SO NOW WE SAY,  
A HAPPY NEW YEAR MAY THIS BE TO YOU.

—ARTHUR M. CORWIN.

## IMPORTANT—LIFE MEMBERSHIP

The Executive Committee in working out the details of the plan for the endowment fund have fixed upon \$30.00 as an adequate sum to cover life membership. This was enthusiastically endorsed by the class activities at the November Alumni meeting. Each alumnus, therefore, who pays in full \$30.00 or more, thereby becomes a life member of the association, with no further call for dues. Those who are well off need not stop at this amount. There is no upper limit to their generosity. Liberal contributions from the well-to-do will compensate for the inability of the less fortunate, and so bring up the general average. Such large contributions have been made, and more will be needed.

---

## THE MONSTER ALUMNI MEETING AT THE SHERMAN HOUSE, CHICAGO, NOV. 13, 1913

The alumni meeting held at the Sherman House Thursday evening, Nov. 13th, during the week of the Clinical Congress in Chicago, surpassed all previous meetings of Rush Alumni in points of enthusiasm and numbers. There were 277 members present, and from the very first note of Kloer's band till John Ritter had gathered up the last bits of paraphernalia belonging to his peripatetic office, there was something doing. Goodfellowship filled the air and radiated from all the smiling faces. It fairly beamed from Lavin's rosy cheeks, and scintillated from Fullenweider's polished dome. It broke through stubby beards and fierce mustaches and shed a mellow glow over Cotton's hallowed crown of silver glory. It was no ordinary occasion, this gathering of the Clans of Rush; it was the celebration of the birth of a new era, the bringing to life of a plan to rejuvenate, maintain, and perpetuate our alumni association in a manner worthy of its membership and its high ideals. And such an auspicious birth our endowment fund experienced with President Corwin master of ceremonies, Dr. Ritter a close second, and 275 admiring M.D.'s assisting in the nativity. It is said that every child has the right to be well born. If this isn't being well born then we are willing to be shown.

Reports began coming in early from scattering precincts of contributions to the endowment fund, but it was not until the good things in the stomach began to titillate the heart that the real music commenced, and the classes vied with each other in their efforts to outdo their rivals. The enthusiasm ran so high that

Parkes and McEwen of the class of 1897 were only with difficulty and threats of financial ruin restrained from pledging their class for the entire amount of the fund. As it was, the eighteen members present signed pledges for \$540.00, with the class of 1900 a close second with \$445.00 and only eleven members present.

The appended list gives the individual pledges and the totals of the classes to which they belong, as well as the grand total of \$3,980.00, which, added to the \$1,000.00 already subscribed by Dr. Norman Bridge, brings the present fund up to \$4,980.00; not a bad start for so young an infant. One hundred dollars in cash and checks of the above amount was paid in during the evening. The amount previously recorded in the September BULLETIN is included in this amount, as many promising then signed the printed forms passed around at this meeting. It early became manifest that class rivalry and the idea of a \$30.00 contribution providing a life membership with no further dues were the most important influences in the raising of the fund. However, many did not stop at this limit, and individual pledges ran to \$50.00, \$75.00 and \$100.00. Of course this is but the leaven, and could be participated in only by the members present; the many loyal alumni busy throughout this broad land sharing the influence only indirectly through the efforts of their more fortunate fellows. We shall hear from these later as classes become better organized for the propaganda. We hope that some of our more fortunate members may emulate the example of Dr. Bridge when the project is well under way and their contribution is solicited. It will be noted in the list that many very liberal contributions have already been made. With so good a start the success of the undertaking is assured. The list of new contributions to the fund will be an interesting feature of the succeeding issues of the BULLETIN.

#### LIST OF INDIVIDUAL AND CLASS PLEDGES

	Amount pledged	Total for class	Amount paid
Class of 1869—			
Jas. W. McLean, Fayette, Iowa .....	\$30.00	\$30.00	.....
Class of 1871—			
W. T. Leonard, St. Paul Park, Minn. ....	30.00	30.00	\$10.00

C. C. Tellesen, Chicago, Ill. ....	15.00	180.00	.....
Class of 1912—			
Morris Fishbein, Chicago, Ill. ....	25.00	25.00	.....
Totals .....	\$3980.00	\$3980.00	\$110.00
Class of 1898—			
Victor F. Marshall, Appleton, Wis. ....	30.00	.....	30.00

This last contribution brings the grand total to date to \$5,010.00. No effort was made at the meeting to collect on the fund, although some who were anxious to get it out of their systems gave cash and checks at the time. This is rated in an appropriate column.

This is in no way to be understood as reflection upon the majority who have not paid, as it was not demanded of them, the time limit being June, 1914.

Checks may be sent in at any time, however, and receipts will be sent until a certificate of life membership that is being prepared is ready to send out.

Many classes and individuals were not ready to make a report so soon, but agreed to do so later. The class of 1889 has its Twenty-Fifth Anniversary in February, 1914, at which time the members expect to make a report. We may expect something handsome from them, as well as from the class of 1884, whose Thirtieth Anniversary will be celebrated at the same time.

The class of 1893, besides pledging \$170.00, expects to raise \$1,500.00 in all, and the class of 1897 with the present pledge of \$540.00 expects to do equally well. So far the class of 1878, with a pledge of \$1,090.00, \$1,000.00 of it paid, stands at the head of the procession. Of course not every class can have such large individual contributions, although all have just as loyal alumni. Dr. J. H. Thornton of Lansing, Iowa, of the class of 1879, offered to send his check when notified, and suggested Dr. Saml. Bailey of Mt. Ayr, Iowa, of his class as the likely man to put through the work of his class. By the way, a glance at the list of alumni of the year of 1879 will reveal some rather interesting men, of whose name and fame we are almost daily reminded.

Owing to the fact that many who were present at the dinner had to leave for another important meeting at 8 o'clock, they were not enabled to come in on this report.

Others, also, had signed the pledges before the \$30.00 life membership plan was announced. Many of these will no doubt raise their pledge to this amount as soon as they have the opportunity which will be given them.

CHAS. A. PARKER, Secretary.

Drs. Mehler and McCoy, class of 1863, were the star members present. It was their golden anniversary and they carried their years as lightly as many a more recent alumnus.

The class of 1896 elected Elmer Kenyon president, and Morley Bates secretary. We can expect to get the busy signal from them at a very early moment.

Classes 1896 and 1897 had the largest representation present, about twenty members each, receiving the prize of a box of cigars for the classes having the largest attendance. We hope that the ropes were not loaded.

#### NEWS OF THE ALUMNI

J. R. Greer, '12, is in Dr. Herrick's office.

F. W. Gaarde, '12, is in Dr. Billings' office.

F. E. Roberg, '12, is practicing in Joliet, Ill.

George H. Steele, '10, is practicing in Arizona.

E. S. Edgerton, '10, is practicing in Wichita, Kan.

E. W. Koch, '12, is teaching at the University of Indiana.

Dr. A. Vanderhoof, '03, has moved to Colorado Springs, Colo.

Eugene Cary, '12, has opened an office in the Monroe Building.

Frederick I. Brown, '90, is studying for the operative stage in Paris.

D. M. Berkman, '12, is on the medical staff of St. Mary's Hospital, Rochester, Minn.

Cassius Marion Chaplin, '90, has returned from old Mexico and located at Cuervo, N. Mex.

Solomon Eisenstedt, '90, is president of the Wendell Phillips High School Parents' and Teachers' Club for the year 1913-14.

Arthur C. Pearman, '10, is located in the William Brown Building, Rockford, Ill., and was in the Cook County Hospital, 1910-12.

A. M. Moody, '10, former pathologist to the Presbyterian Hospital, has taken the same position at St. Luke's and is succeeded by H. K. Nicole.

Dr. Aaron Arkin, '12, is professor of pathology and bacteriology in the West Virginia University, also chief of the bacteriological and pathological laboratories of the West Virginia State Board of Health.

O. F. Scott, '08, and A. M. Shaw, '10, are associated at Argo, Ill., with offices at Clearing, Ill. They have charge of twelve large factories in that region and are members of the staff of the Argo General Hospital. Dr. Scott is head surgeon. Dr. Shaw was formerly in Kansas City.

---

## REPORT FROM THE CHAIRMAN OF THE RUSH ALUMNI REUNION COMMITTEE ON THE WISCONSIN MEETING

JOHN RITTER, M.D., '80

From old Wisconsin comes the cheerful and glad tiding of a most successful and enthusiastic Rush Alumni Reunion held at Milwaukee on the occasion of the annual meeting of the State Medical Society in that city October 1 to 3. Alumni members to the number of seventy-seven from every section of the state assembled at luncheon at the Phister Hotel at noon of the first day's meeting of the State Society, and a more cheering and joyous meeting was never held in that state. No set speeches were made; impromptu remarks from many Alumni members were well received; all were to the point and all were expressions of loyalty and warm affection for our common Alma Mater, "Old Rush."

As a Badger who went away from old Wisconsin many years ago to labor in the field of practical medicine in the State of Illinois, and like all other good Badgers, occasionally recalls the good old boyhood days in Wisconsin, looks back to old Wisconsin and does not forget that she still cherishes us as of yore, I must refer to what we have inaugurated here in Illinois as the Wiscon-

sin Society of Chicago. On the occasion of the second annual meeting of this society, a resident of this city, Mr. Tom J. Nicholl, had inscribed to me a beautiful jingle on old Wisconsin which I think is most opportune as a beautiful refrain for the Rush Alumni Reunion held at Milwaukee and intending to show the felicitous feeling we Badgers who have gone away always cherish for old Wisconsin, particularly we medical men residing here have for all fellow Alumni who now reside in our home state as we all cherish our common "Alma Mater," old Rush, whose home is in this city.

### IN OLD WISCONSIN

Oh, could I spend the years to come  
     In Old Wisconsin.  
 The fairest state beneath the sun,  
     Is Old Wisconsin.  
 Where friends are friends you love to meet,  
 On country road or city street,  
 A garden spot that can't be beat  
     Is Old Wisconsin.

The song birds singing in the wood  
     In Old Wisconsin.  
 They seem to chant that all is good  
     In Old Wisconsin.  
 Where wild flowers bright and lilacs bloom  
 Scent up the air with sweet perfume,  
 And nature's free from every gloom  
     In Old Wisconsin.

The skies are fair from morn till night  
     In Old Wisconsin,  
 And every cloud you see is white  
     In Old Wisconsin.  
 God's sunshine beams on every hand  
 Just as it does on Heaven's strand,  
 But never shone on fairer land  
     Than Old Wisconsin.

The home of statesmen staunch and true  
     Is Old Wisconsin.  
 They stand for country's honor too,  
     And Old Wisconsin.  
 And who'd be first to muster in  
 To face a foe in battle's din,  
 And tote our flag thru thick and thin?  
     Why Old Wisconsin.

TOM J. NICHOLL.

The following Wisconsin members of the Alumni Association were in attendance at that gathering:

W. H. Washburn, Milwaukee.....	'77
J. R. Currans, Two Rivers.....	'78
B. J. Bill, Genoa Junction.....	'79
James Cavanaugh, Milwaukee.....	'79
B. C. Gudden, Oshkosh.....	'79

J. V. R. Lyman, Eau Claire.....	'80

The luncheon was a very enjoyable affair, and we were sorry that there was no one up from the college to attend it. The attendance (77) was practically twenty-five per cent. of the total Alumni in the state. The oldest man was of the class of '77, and the youngest of the class of '12, as you will see from the appended list.

The program was entirely impromptu, just a get together meeting of the old boys, and the spirit of good fellowship prevailed everywhere. Dr. B. M. Caples acted as toastmaster, and the following responded: Drs. W. H. Washburn, '77; J. R. Currens, '78; B. C. Gudden, '79; B. J. Bill, '79; J. C. Wright, '82; L. R. Head, '85; J. R. McDill, '85; A. J. Hodgson, '86; C. A. Armstrong, '87.

S. B. ACKLEY.

### TO THE RUSH CLASS OF '96

This article is intended to reach every member of the Rush Class of '96.

It tells of the beginnings of an awakening among the members of the class. Seventeen years is a long time to lie dormant. Is there any more reason why old friendships of '96 should be allowed to die for want of cultivation than old friendships in the various classes of other colleges or of other classes in Rush? Why is it that Rush classes, in contrast with the classes in other colleges, have not realized the desirability of cultivating their undergraduate friendships through life? Some Rush classes have realized this, but why has a universal system not grown up to that end? Do Rush men, and especially the members of '96, not know that in other colleges the class organization continues from the undergraduate days on through all the years of life, keeping the members in touch, stimulating meetings of members, and preventing the dying out of the old feelings; and is this not worth while?

During the Rush dinner at the Sherman House in Chicago last November, the eighteen members of the class of '96 then present, eight of them being from out of Chicago, determined to instigate a movement to rejuvenate old '96 memories and to keep them

rejuvenated for the rest of life, through the agency of a class organization. On motion of Dr. W. D. Brode a temporary chairman and secretary were elected to sound the class and set the movement rolling. E. L. Kenyon was chosen chairman and M. D. Bates secretary. This was Step Number One.

Step Number Two followed as a consequence of Step Number One and took place at the Bismarck Hotel in Chicago on Dec. 6, 1913. The following members of the class were present at this enthusiastic and memorable meeting: Bates, Bell, Brode, Engels, Fosberg, Fullenwider (who came all the way from LaSalle, Ill., to attend this meeting), Hanson, Kenyon, Lubbinga, Lynch, Lyon, McDowell, L. D. Rogers and Whammond. This is the honor roll. Let these always be held in blessed memory, for through their foresight and loyalty every member of the class will be blessed. Others would be on the honor roll, too, if such events as acute appendicitis and childbirth had not kept them at their professional duties. But still others did not realize the important significance of such a meeting, and, therefore, remained at home. Their awakening will be a slower process, but they are too wide awake in other directions to remain dormant in this.

If it were possible to picture the feelings of members of the class upon meeting old friends for the first time in seventeen years, not a Chicago member would be absent at the next meeting. Engels tried to express what all felt, when he said that certain deep, indescribable emotions stirred him upon coming in touch with the old boys once more. Remember, we were not in the turmoil of a large, noisy banquet hall, but were in the cozy "Dutch Room" of a hotel, where we could renew old memories to our hearts' content, and you would have liked to hear and tell of the old experiences as much as we. So we talked and planned until after midnight and were better for it. You came in as a subject for this talk, not unlikely, for you had friends at that meeting.

Well, this is what the meeting decided to do. On Fullenwider's motion it was determined to undertake the work of organizing the class on a permanent basis, with a temporary chairman and secretary to inaugurate the work. Bates was elected the new temporary chairman, and Kenyon the new secretary. It was determined that the Chicago and suburban members of the class, and others so far as they could be enlisted, should undertake to set the movement going and should then turn over the preliminary plans to the class as a whole at commencement time next June. To this end a committee on organization consisting of Brode, chairman, Henderson, Whammond, Bates and Kenyon, ex-officio, was appointed. This committee is instructed to report to a meeting of the Chicago and suburban members to be called early in 1914, and later to the class itself next June. If found feasible these preliminary plans are also to be brought before the members

of the class present at the Illinois State Medical Society meeting at Decatur next June, and possibly at other state meetings also.

Each member of the class may expect to be communicated with concerning these plans both through the next BULLETIN and also through individual letters. The hard thing is to bring about concurrent action among the members who live at a distance from each other. But this and all other difficulties will be surmounted so far as they can be. The movement is on and we want your co-operation. Send in your encouragement, greetings and suggestions to the temporary secretary, Dr. E. L. Kenyon, 104 S. Michigan Ave., Chicago. We need your aid and stimulation. Your communication will be read before the next preliminary meeting, probably to be held in February. HERE'S TO '96 IN THE PAST AND ESPECIALLY TO '96 IN THE FUTURE!

---

ADDRESS OF THE CHAIRMAN OF RUSH ALUMNI  
REUNION COMMITTEE AT THE RUSH DINNER.  
HOTEL SHERMAN, CHICAGO, NOV. 13, 1913

*Members of the Alumni Association:* In taking up a daily paper a few days ago, I noticed that a local school society is going to give a dance in the near future at this hotel for the purpose of increasing its building fund. On the same page I see that the lady graduates from a certain Eastern ladies' seminary are going to give a series of entertainments and dances to increase this endowment fund, and again on the opposite side of the paper I read that the New York Y. M. C. A. in a single day have raised a fund of \$2,000,000 towards a proposed \$4,000,000 building fund, a generous and philanthropic Chicago merchant contributing \$50,000. From all this we see that raising of appropriate endowment funds is in the air. We are just in the swim. It is popular just now, and if popular it is right; if right it will be successful. You are now all familiar with a plan as outlined in the BULLETIN for the raising of a fund. Your president, Dr. A. M. Corwin, has just introduced me as the Class Organizer, and as such many suggestions have been made to me from various members of our association for the raising of revenues, all of which ought to be discussed here.

1. Some one suggested an annual theater party, a Rush night. I have made inquiry at several theaters. Some mentioned the securing of the entire floor space for some definite night at a price from \$800 to \$1,000, and we to sell the seats and make what we could out of this venture, or secure between 200 and 400 seats for a certain evening performance and on a sale of 400 seats at \$2 a seat, a rebate of 25 per cent. would be paid to our association. I doubt very much if such a plan would be profitable. I believe this proposition out of the question.

2. Second Suggestion. Vital Statistics. In order to make this plain it will be necessary that I give you, as a preliminary, a few facts concerning vital statistics. The number of births recorded in 1910 in Cook county equaled 25,893; in 1911 equaled 31,411. In December, 1911, the present county clerk, Mr. Sweitzer, secured from the county commissioners an appropriation of \$5,000 to meet the law now enforced paying to physicians the sum of twenty-five cents for each birth recorded. A notice was sent out to all physicians and midwives in Cook county apprising them of this fact. This stimulation caused the recording of 44,848 for 1912, and for the present year the total number of births recorded will exceed 48,000, or on an average of 4,000 monthly, of which number 2,000 are reported by physicians and about 2,000 by midwives. Of this number, only about one-half or 2,000 are monthly collected, the other 2,000 are never asked for. The physicians collect less than the midwives; whereas the physicians collect on 25 per cent of their reports, the midwives collect on 75 per cent., or the physicians collect only for 500 and not for the other 1,500; the midwife on the other hand collects for 1,500, forgetting to collect for the remaining 500. Now, 1,500 births reported each month and not collected for at twenty-five cents each equals \$375. In 1912 4,552 physicians were registered in Chicago, of which number 900, or about one-fifth, are Rush graduates. Assuming that one-half this number or 450 do not practice obstetrics, leaving 450 as general practitioners. Now, of this number only 25 per cent. collect their dues, or 113 receive pay, leaving 337 physicians who have reported births but have failed to collect. This would leave about \$75 per month, or \$900 a year due to practitioners who are Rush graduates.

Dr. J. J. Stoll, class '85, suggested that some arrangement be made whereby this amount could be collected and be added to the "Alumni Endowment Fund." This suggestion deserves some attention from this body.

3. Some one suggested a Tag Day. It would indeed be a grand idea if we could send our wives, sweethearts, or the good looking girls of our acquaintance out into the business district and place a tag on every man and woman for the Rush Endowment Fund. A Rush day. But this is wholly out of the question. I would be pleased to hear some suggestions from some members of this association.

Now a few words to those members who reside outside of the State of Illinois. I would like to ask you individually to make an earnest effort at the annual meeting of your State Medical Society to bring about a Rush Alumni Reunion. At every County, State and National Medical Society meeting you will find many Rush men in attendance, and you will usually find them there as leaders in their chosen medical selection and not as followers.

We are all proud of this fact. Collectively, we all must aim to make Rush Alumni Reunion a distinctive and definite feature at the annual meeting of the A. M. A. Those of you who were present at the meeting of the A. M. A. at Minneapolis in June last and attended the splendid Reunion of Rush at the West Hotel, can attest to the enthusiasm and good feeling displayed everywhere. We are now engaged in the raising of an endowment fund, the foundation for which was laid in this city, but the corner stone of this edifice was laid in Minneapolis. The corner stone was sold there to the highest bidder. Through the generosity and magnanimous spirit of our fellow Alumnus Dr. Norman Bridge, '78, of Los Angeles, California, this corner stone was placed. The day following this splendid gathering at Minneapolis, Dr. Norman Bridge placed into my hands his check for \$1,000 as a nucleus for the Rush Alumni Association Endowment Fund. Now we can not all buy corner stones or cap stones in the building of this beautiful edifice, the Endowment Fund, but we can buy individual bricks, many bricks; it is after all the number of individual units, the bricks, that make the bulk of a great edifice. We welcome your efforts in supplying the necessary bricks to complete this great monument of Rush's strength. Let me impress upon all again the great importance of Rush Alumni Reunion at every State Medical Society meeting, and above all at every meeting of the A. M. A.

JOHN RITTER,

Chairman Alumni Reunion and Relations Committee.

---

#### THE RUSH MEDICAL ALUMNI ENDOWMENT FUND — ITS PLAN AND PURPOSE\*

1. A permanent trust fund raised by the voluntary contributions of the Alumni of Rush Medical College and their friends.

2. This fund shall be held in trust and advantageously and safely invested by the trustees of Rush Medical College, or other trustees chosen by the officers of the Association, for the sole use of, for and by the Alumni Association of Rush Medical College.

3. The principal shall be held intact and the interest shall be turned over annually to the officers of the Association on presentation to the trustees of vouchers signed by the treasurer and countersigned by the president of the Alumni Association.

4. The income from the fund may be used for any of the following purposes:

The promotion of wider acquaintance and fellowship among all graduates of the college; fostering the spirit of fraternity and alumni loyalty by smokers and dinners at the meetings of national, state, county and district societies, as well as through organized effort to provide welcome and extend courtesy to our fellow alumni returning to Chicago on occasion, and especially at commencement

---

\* Reprinted from the November number.

time; the maintenance of a strong, live alumni bulletin; for the interchange of class and state alumni news and the publication of college and graduate matters which are of special interest to this scattered body of men who have no other means of keeping in touch; the maintenance of one or more fellowships for scientific and practical research. The prosecution of such other plans as from time to time the officers may unite on for the benefit of this great alumni body individually and collectively.

5. The officers and committee chairmen shall make full report of the year's work in writing, submitted at the annual meeting in June. The trustees, through the treasurer, shall likewise make report of the status of the fund, and the treasurer shall render itemized account of all expenditures and reserves.

6. All such reports, together with that of the auditors, appointed at the annual meeting, shall be published in the next issue of THE BULLETIN succeeding that meeting.

7. No salary or premium shall be paid to any officer of the Association from this fund.

8. Expenditures from the interest of this fund shall be made only on approval of the majority of the officers.

---

### AN AMERICAN SURGEON IN TABRIZ

Last February the Board of Foreign Missions sent out to Tabriz, Persia, a rather exceptional young man. A graduate of Park College, Dr. Lamme took a course also in the University of Chicago before his medical instruction at Rush Medical College began. This finished, he had a year as intern under Dr. Arthur Dean Bevan at the Chicago Presbyterian Hospital and later a year of private practice in and near Chicago. With this preparation Dr. Lamme might have won his way to high position in America. Yet he chose the small salary and comparative obscurity of the medical missionary in a Moslem country.

There is no hospital at Tabriz. Dr. Vanneman has developed a large dispensary practice and Dr. Edna Orcutt has a woman's dispensary which is doing a fine work, but there is no place where surgical work can be done safely. Tabriz is a city of 200,000 inhabitants and there are many towns and villages near, and there is as yet no access for these people to surgical care. Dr. Lamme writes: "It is hard to see some of these cases, who need surgical care, and have to tell them that maybe in a year or two we will be able to care for them. Some come who cannot be refused, and I have done four major operations—all on Moslems. But these native homes are far from attractive places in which to do modern aseptic surgery, and now that people are hearing that there is a man doing surgery it is becoming harder and harder to meet the demand. The board has authorized the raising of

\$21,000 for the proposed hospital plant—a modest one but sufficient for our present needs. We have already purchased a nice piece of ground, but we lack about \$6,000 of the desired amount, exclusive of furnishings. The board has appropriated some and hopes that we may be able to find those who would be willing to make up the remainder. I think we could be almost self-supporting. 'The dispensary has been so for over twenty years.'

Anyone interested in giving to this hospital, over and above regular pledges, should address Dwight H. Day, treasurer, 156 Fifth Avenue, New York City. "A Christmas present for Persia—the country whence came the magi following the star to where the young child lay!"—*Continent*, Dec. 18, 1913, Dr. Claude W. Lamme, '10.

---

### THE ADDRESS BOOK AGAIN DELAYED

A source of information has lately opened up to us which will help greatly with the correctness of the list. The Executive Committee feels that should be made use of. The book is being corrected and will be ready, we hope, in February.

Report of the Alumni Association, College of Medicine, University of Illinois, has come to our notice. This report shows a remarkable advance in medical education. The alumni and faculty in less than a year's time raised money enough (about \$30,000) and enough stock to turn the medical school (P. & S.) over to the University of Illinois free of debt. The alumni raised about \$15,000. Some of our alumni are on this faculty, and helped by their contributions. These same alumni of Rush are helping to raise the alumni endowment fund for Rush. Dr. Corwin, our president, is one.

---

A PROPER DIAGNOSIS.—Patient—"Doctor, I can't sleep at night. I tumble and toss until morning."

Doctor—"H'm, that's bad. Let me see your tongue. (After diagnosis.) Physically you are all right. Perhaps you worry over that bill you've owed me for the past two years."

---

MEDICAL NEEDS.—"Did you hear about the woman who invented a device for keeping poultices hot?"

"Nothing in that; what the world needs is an invention to keep mustard plasters cool."

## A LIST OF ARTICLES PUBLISHED DURING 1913 BY THE ALUMNI AND MEMBERS OF THE FACULTY

The following list is necessarily far from complete. Alumni are requested to send reprints of their articles to the library of the college, marking on the cover "For Reprint List." All articles so received will be listed in this department as acknowledgment.

Austin, M. A., '97. Bird-cage disease. *Am. Jour. Clin. Med.*, 1912, xix, 828.

Austin, M. A., '97. The rag weed doctor. *Am. Jour. Clin. Med.*, 1912, xix, 1092.

Bartlett, F. K., '12. A case of acromegaly and polyglandular syndrome with special reference to the pineal gland. *Arch. Int. Med.*, 1913, xii, 201-214.

Bassoe, P. (member of faculty). The late manifestations of compressed-air disease. *Am. Jour. Med. Sc.*, 1913, cxlv, 526-543.

Belfield, W. T., '78. Skiagraphy of the seminal ducts. *Jour. Am. Med. Assn.*, 1913, lx, 800.

Belfield, W. T., '78. Vasostomy-radiography of the seminal duct. *Jour. Am. Med. Assn.*, 1913, lxi, 1867.

Bevan, A. D., '83. Medical education and the hospital, *Jour. Am. Med. Assn.*, 1913, lx, 974-979.

Billings, Frank (member of faculty). Benzol in the treatment of leukemia. *Jour. Am. Med. Assn.*, 1913, lx, 495-499.

Billings, Frank (member of faculty). Chronic focal infections and their etiologic relations to arthritis and nephritis, *Jour. Infect. Dis.*, 1913, lxi, 484-489.

(Trade Mark)

### New Fabric Wool and Rubber

It is made of gray wool interwoven with a covered rubber thread. The Abdominal Supporter is exceedingly beneficial for protection, support and warmth, as well as reducing obesity, and non-interference with breathing. The Anklets, Knee Caps, Leggings and Elbow Caps are not only a great advantage for warmth and support, but often a wonderful relief for rheumatism in the joints.

In ordering the above articles give circumference at letters marked on cuts.

The Abdominal Supporters are **\$2.50** with an additional cost for the extra large sizes. The other pieces are all **\$1.50** unless extra large, which would be an additional cost.

# RUSH MEDICAL COLLEGE

In Affiliation with the  
**UNIVERSITY OF CHICAGO**

**CURRICULUM**—The fundamental branches (Anatomy, Physiology, Bacteriology, etc.) are taught in the Departments of Science at the Hull Biological Laboratories, University of Chicago. The courses of two (or three) clinical years are given in Rush Medical College and in the Presbyterian, the Cook County, the Children's Memorial, the Hospital for Destitute Crippled Children, and other Hospitals.

**HOSPITAL YEAR**—A fifth year, consisting of service as an interne under supervision in an approved hospital, or of advanced work in one of the departments, leads to the degree of M.D., *cum laude*.

**SUMMER QUARTER**—The college year is divided into four quarters, three of which constitute an annual session. The summer quarter, in the climate of Chicago, is advantageous for work.

**ELECTIVE SYSTEM**—A considerable freedom of choice of courses and instructors is open to the student. This is not designed, however, to encourage the student to fit himself for any special line of practice, but for its pedagogic advantage.

**GRADUATE COURSES**—Advanced and research courses are offered in all departments. Students by attending summer quarters and prolonging their residence at the University of Chicago in advanced work may secure the degree of A.M., S.M. or Ph.D. from the University.

**PRIZE SCHOLARSHIP**—Six prize scholarships—three in the first two years and three in the last two (clinical) years—are awarded to college graduates for theses embodying original research.

PUBLISHED SIX TIMES A YEAR

BY

RUSH MEDICAL COLLEGE

IN AFFILIATION WITH

THE UNIVERSITY OF CHICAGO

Commencement Exercises this year will be held Wednesday, June 10th, at 3 P. M., at Ryerson Hall, University of Chicago. Arrangements are being made by the Executive Committee for a programme during commencement week at least. The Faculty and Alumni dinner will be given by the Trustees of the College and will be held on the evening of June 10th. This will be a complimentary dinner to all of the Alumni. Make plans to be present. Completed programme will appear in the next issue before commencement.

## ALUMNI ADDRESS BOOK

The plans for the Address Book have grown somewhat since the undertaking was begun. We have now about completed the book and are sure it will be issued before commencement. All who have contributed at least a dollar to the Membership Fund or the Fellowship Fund during the last year, or made corrections as per our offer, or is a life member, will be entitled to and given one of the books. Get in your subscriptions now and you will be entitled to an Address Book. If you receive a pink slip with this Bulletin you are not a member of the Association.

## THE ENDOWMENT FUND

The endowment fund continues to hold the interest of the officers and many of the other members of our association. Much good work has been done since the January issue in the way of organization of classes and the mailing of personal letters to the entire membership of several classes by one person in each class taking upon himself the task of canvassing his own classmates. This method has proved very effectual in the classes so organized and we hope eventually to have all classes working on such a systematic basis. With the many professional duties that even the city members have there has not been time to effect such a complete organization, but the results so far have inspired us to keep on with our efforts. It was not until the latter part of March and the first of April that the first letters requesting redemption of pledges were sent out, yet, up to this time, April 25, 1914, fifty members have already paid for life certificates. And, by the way, the life membership certificates with an engraving of "Old Rush" in the title are beautiful documents that our members will prize next to their diplomas. Besides these we are preparing a "life membership roll" in which will be inscribed the names of all our life members in the order of issuance of certificates, with their addresses, date of graduation, amount contributed and such other general data as appear appropriate.

This roll will be available for inspection to all visiting alumni and it is believed its artistic appearance and durability will be well worthy of the dignified purpose to which it is dedicated.

Ask for it at the reunions, commencements and other alumni occasions. These are only pleasant incidentals in our main project, the raising of our endowment fund, but these real tangible reminders do us all good as we work along among prosier problems.

Compare this issue of the BULLETIN with the last one in January and note the paid column of our endowment fund. You will also notice many new names in both columns.

Most of the pledges are payable June 1, 1914, by which time we hope to have most of the amount in the paid column.

---

CHICAGO, ILL., Dec. 27, 1913.

*To the Board of Trustees of Rush Medical College:*—The Rush Medical College Alumni Association is engaged in an effort to raise an endowment fund for the use of the association, and it is believed that a deposit of the fund, as and when it is raised, with the trustees of Rush Medical College will greatly aid in raising

the fund and in promoting the interest of the members of the association in raising the fund. We, therefore, request that your body consent to hold the fund as it is raised and deposited with you and invest and reinvest the fund in securities with the consent and advice of the board of directors of the Alumni Association, or its authorized committee in the behalf; and that you pay the interest which may accumulate and be collected upon the securities of the fund to the treasurer of the association when collected and as collected, or semi-annually as the board of directors of the association may request, and that your body shall sell the securities or realize upon the securities as and when the association, by its officers or committees, shall authorize you.

It is to be understood that the Alumni Association does not ask you as a board of trustees to become responsible for the moneys and securities deposited with you, except to hold and safely keep them and pay them over upon the order of the association as indicated; in other words, that the officers and authorities of the association will assume the responsibility of the investment of the fund.

The early acceptance of this trust will aid us materially in raising the fund, for it will be an assurance to the alumni body that the fund will be safely held and invested, and that by a body of men interested in the alumni as well as in the college.

Very respectfully,

A. M. CORWIN, President.

---

March 17, 1914.

*Dr. Arthur M. Corwin, M.D., President Rush Medical Alumni Association, 15 East Washington Street, Chicago.*

*Dear Sir:*—At a meeting of the Board of Trustees of Rush Medical College held March 5, 1914, the communication of the Alumni Association dated Dec. 27, 1913, was presented. After consideration of the subject, the Board of Trustees voted to concur in the recommendation of the committee which had had this matter under consideration and to express to the Association the willingness of the Board to accept the endowment fund as and when it is raised in accordance with the terms of the request of the association as contained in your communication of Dec. 27, 1913.

Very truly yours,

JOHN J. GLESSNER,

President Board of Trustees of Rush Medical College.  
J. SPENCER DICKERSON, Secretary.

25<sup>th</sup> ANNUAL REUNION & DINNER  
 Class of '89  
 RUSH MEDICAL COLLEGE  
 University Club Feb. 15, 1914

Class of '89 at their 25th anniversary dinner (see page 8).

REUNION OF THE CLASS OF 1889, ON THE OCCASION  
OF THE TWENTY-FIFTH ANNIVERSARY OF  
GRADUATION, FEB. 19, 1914

At 9 a. m., Feb. 19, 1914, about forty of the members of the class of '89 attended the clinic prepared by Professor Bevan in the upper amphitheater of the old college building. Among those who participated in the clinic were the following members of the faculty: Professors Bevan, Herrick, Lewis, Bassoe and Phemister. The clinic was thoroughly enjoyed by every one present. After the clinic the members of the class were invited to a luncheon by the Presbyterian Hospital, and while being served with a most bountiful luncheon the men improved the time renewing the acquaintances which in many cases had been interrupted for twenty-five years. At 6 p. m. the members of the class assembled at the University Club, and after an informal reception, sat down to dinner at 6:45 p. m. The arrangements for the dinner had been made by Dr. Bergeron and were most satisfactory. Abundant and choice floral decorations for the tables had been furnished by Dr. Flood. An object of much interest in the dining-room was the class picture, which had been brought from the college and suitably decorated. Dr. Herbert A. Robinson, president of the class, presided, and during the dinner music was furnished by an orchestra under the direction of Dr. E. Perry Rice.

When dinner was finished, Dr. H. A. Tyler, chairman of the executive committee, was called upon to preside. Brief reports were made by Dr. Tyler for the executive committee and by Dr. G. H. Weaver, secretary. Dr. Tyler read letters from several of the class who were unable to attend. Dr. H. S. Barnard read a class poem. Brief talks were made by Dr. John R. Minahan and Dr. George F. Butler. The latter concluded his remarks by reading a poem, "After Twenty-Five Years," which was received with much enthusiasm.

A meeting of the Rush faculty being in session in an adjoining room, Prof. E. F. Ingals and Prof. A. D. Bevan, the only living members of the faculty as it existed in 1889, and present in Chicago, were invited to address the class. Both were received with enthusiasm and made happy talks. Prof. J. B. Herrick brought the greetings of the faculty to the class of '89, and Dr. Lowell and Dr. Clapp were delegated to carry the greetings and good wishes of the class to the faculty.

At this time the election of officers for the next five years resulted as follows: H. A. Tyler, president; Charles E. Albright, first vice-president; William H. Lane, second vice-president; G. H. Weaver, secretary-treasurer; H. S. Barnard, poet; A. D. Lowell, chairman executive committee. Dr. Lowell was asked to select the other members of his committee.

Dr. Lowell and Dr. Bergeron presented the matter of the Alumni Association Endowment Fund. Several of the alumni present spoke in favor of the class being well represented among the subscribers to the fund. The following members of the class agreed to pay \$30 and so become life members of the association: Henry A. Norden, H. S. Barnard, H. A. Robinson, Joseph Z. Bergeron, C. B. Clapp, Elmer Coolley, John F. Boyd, George F. Butler, John Flood, Solomon Greenspahn, Edward Otto, Charles E. Albright, C. H. Bryan, Harry B. Snee, Edward B. Holden, James W. Fitzmaurice, O. B. Hayes, Henry B. De Bey, John P. Roark, John R. Minahan, F. S. J. Bessette, Frank G. Crowell, E. I. Hook, A. G. Wernicke, E. Perry Rice, William P. Sherman, H. A. Tyler, A. D. Lowell and G. H. Weaver.

The secretary was instructed to offer an opportunity to the remaining members of the class to contribute to the fund.

The meeting was concluded by short remarks from a number of those present, and adjournment was taken to meet again on Feb. 19, 1919. Out of 136 original members of the class, eighteen are known not to be living and eleven are unaccounted for, leaving 107, of whom forty-seven were present at the reunion.

Those in attendance were:

Charles E. Albright, Wells Building, Milwaukee, Wis.; A. W. Baer, 29 East Madison Street, Chicago; H. S. Barnard, 4033 Vincennes Avenue, Chicago; Joseph Z. Bergeron, 104 South Michigan Avenue, Chicago; F. S. J. Bessette, 2657 West Thirty-Eighth Street, Chicago; John Frank Boyd, Paducah, Ky.; John T. Brown, Paris, Ky.; Clarence H. Bryan, 3019 Indiana Avenue, Chicago; George F. Butler, Attica, Ind.; Thomas J. Case, Unionville, Iowa; Samuel R. Chancellor, 32 East Markland Avenue, Kokomo, Ind.; C. B. Clapp, Moberly, Mo.; Elmer J. Cole, Woodbine, Iowa; Elmer Coolley, The Temple, Danville, Ill.; Frank G. Crowell, Rochelle, Ill.; Albert S. Cunningham, Goldfield, Iowa; Henry B. De Bey, 1606 West Twelfth Street, Chicago; Joseph G. De Steffano, 844 Ewing Street, Chicago; James W. Fitzmaurice, 2876 Archer Avenue, Chicago; John Flood, 36 West Randolph Street, Chicago; Solomon Greenspahn, 3209 Douglas Boulevard, Chicago; P. B. Hayes, 3008 West Jackson Boulevard, Chicago; Edward B. Holden, 4001 Gladys Avenue, Chicago; E. I. Hook, 2706 North Rockwell Street, Chicago; E. W. Kellogg, Majestic Building, Milwaukee, Wis.; Edwin Kline, 3862 Park Avenue, Chicago; Eugene Krohn, Black River Falls, Wis.; William H. Lane, Angola, Ind.; John J. Looze, Grand Rapids, Wis.; A. D. Lowell, 6966 North Clark Street, Chicago; James W. Milligan, Indiana State Prison, Michigan City, Ind.; John R. Minahan, Green Bay, Wis.; Ivan B. Mishoff, 413 Goldsmith Building, Milwaukee, Wis.; Henry A.

Norden, Winfield, Ill.; Edward Otto, 1337 Larrabee Street, Chicago; William E. Owen, Cedar Rapids, Iowa; William E. Putnam, Whiting, Ind.; E. Perry Rice, 400 Fisher Building, Chicago; John Paul Roark, Bushnell, Ill.; Herbert A. Robinson, 368 Park Avenue, Kenosha, Wis.; William P. Sherman, 31 South Broadway, Aurora, Ill.; Harry B. Snee, South Bend, Ind.; Joseph F. Somes, Vincennes, Ind.; Thomas J. Stafford, Stockton, Ill.; Harvey Tyler, 108 North State Street, Chicago; George H. Weaver, 1743 West Harrison Street, Chicago; Oscar G. Wernicke, 1533 West Congress Street, Chicago.

---

### CLASS OF '96

The Chicago and suburban members of the class of '96 held a smoker on March 31. They determined enthusiastically to go on with the organization of the class. The report of the committee on organization was, after full discussion and amendment, passed. It was determined to launch the plan at a dinner of the whole class to be called at commencement time next June. The committee on arrangements for the dinner consists of Bates, Fosberg, Stowe, Bell, Brode and Kenyon (chairman). Members of the class will do well to get ready to fall into line.

Morris Fishbein, Chicago, Ill.....	30.00	30.00	10.00
Totals.....	\$6,362.00	\$6,362.00	\$2,762.00

The actual amount of cash in the bank to the credit of the fund April 21, 1914, is \$2,775.72. This is determined by adding \$15.42 interest, Jan. 1, 1914, to the amount paid in, making \$2,777.42, from which \$1.70 exchange on checks is deducted, leaving \$2,775.72.

## CHEERING LETTERS OF RESPONSE

REDLANDS, CAL., Feb. 19, 1914.

*Dear Parker:*—You fellows are “kicking up Jack” back there sure enough. Success to you in the enterprise. Push into it hard. It ought to go thru easily.

Fraternally,

JOHN A. SHRECK, '91.

February 16.

*My Dear Doctor Parker:*—I enclose check for \$30 as requested. Let the good work go on. With best regards.

Very truly,

DON S. HARVEY, '91.

BLOOMINGTON, ILL., Feb. 17, 1914.

*Dr. Charles A. Parker,*

*My Dear Parker:*—Your circular letter of the 27th inst., regarding the Alumni Association proposition, has been received.

I enclose you herewith my check for \$30, which seems to be the popular sum. I see no reason why our class should not have at least fifty contributions, for, so far as I know, all the boys are reasonably prosperous.

I leave tomorrow for a month in Florida. I think the sunshine and roses will look pretty good to me after having bumped around through the blizzard of the past week.

With personal regards, I am

Sincerely yours,

Enclosure.

CHARLES E. CHAPIN, '91.

---

1420 LAKE SHORE DRIVE, CHICAGO, Feb. 16, 1914.

*My Dear Doctor Parker:*—Although I severed my connection with the medical profession almost as soon as I was permitted to call myself a member of it, I can assure you that my subscription to the endowment fund will not be in tainted money. I am sending my check for thirty dollars, with this mail, to the First Trust and Savings Bank.

Very sincerely yours,

ARCHIBALD FREER, '91.

---

*Dr. Charles A. Parker,*

*Dear Doctor Parker:*—I enclose herewith subscription of \$30 towards the Rush Alumni Association Endowment Fund.

I fully appreciate the good work that Dr. Bevan is doing for surgery and I am glad to contribute towards this fund.

Very sincerely yours,

CHARLES H. LEMON, '91.

---

#### MEETING OF THE EXECUTIVE COMMITTEE AT THE COLLEGE INN, SHERMAN HOUSE, APRIL 20, 1914

There were present at this meeting Drs. Rhodes, Weaver, Corwin, Fishbein, Hayman, Ritter and Parker, and Mr. Harper of the college.

If the earnestness and good feeling expressed in the meeting augurs anything it means a real old-fashioned home-coming for the graduates of Rush during commencement week in June.

Drs. Weaver and Ritter and Mr. Harper, registrar of the college, were appointed a committee of arrangements, or steering committee, on clinics and other affairs at the college. They will enlighten us in a later issue of the BULLETIN as to their plans and

specifications, but it was tentatively agreed that there would be clinics from 9 o'clock in the morning until some time in the afternoon of both days preceding the day of graduation on Wednesday, June 10, when the clinics will extend through the forenoon only. There will be a luncheon in the laboratories after the morning clinics on Monday and Tuesday. It is guaranteed that no one will be lost in the halls and dark passages of the old building this year as we expect to have a member from each class to welcome his fellows in the familiar haunts. And more! What do you think of this? The banquet supper is to be free to every Rush alumnus! a good supper, good fellowship and Good Old Rush, what more can one desire? Sell the horse, put a mortgage on the automobile, turn your shingle to the wall and come. You can't afford to miss it.

A report on the endowment fund showed over \$2,600 in the bank and \$90 more were added at the meeting. Life membership certificate No. 50 has just been issued. The second fifty will no doubt come faster as more are becoming interested as its success is assured. This issue of the BULLETIN shows the contributions up to date.

Dr. Kaethe M. Dewey of the class of 1912 engrosses our certificates for us, and those who have seen them appreciate the beauty and skill with which it is done.

The banquet committee appointed by the president consists of Drs. Rhodes, Corwin, Ormsby, Fishbein and Parker, and Mr. Harper. Do you know any of them? Come and renew your acquaintance. See what your roommate is doing after twenty years. Save your best stories, count up your laparotomies, your hernias, your prostatectomies or anything you think you excell in and spring them on your fellow classman. Never mind if you are a little reckless with your ciphers; he will be doing the same. Bring along your children if they are also alumni, yes, even the grandchildren if they have followed in your honorable footsteps.

A later number of the BULLETIN, to be issued shortly before the graduation exercises, will contain more detailed information in regard to clinics, meeting places, headquarters, etc. It is also intended to have in this BULLETIN a schedule of clinics held by Rush Alumni in the various schools and hospitals throughout the city during commencement week. Come and see your classman. He will save his best stunts for you, and remember that he is one of the big men in his line in the city.

These things are only a foretaste of what is planned for our visiting and resident alumni. Send in your suggestions now. You want it to be a success and you have your opinion of what success is.

CHARLES A. PARKER, Secretary.

There will probably be forty-six interns taken into the County Hospital during the coming year; of these Rush has twenty-two, including the first two places. Northwestern has fifteen places and Physicians and Surgeons nine places.

## A BIOGRAPHY OF CHARLES T. PARKES

Dr. Charles H. Parkes, son of the late Charles T. Parkes, desires the cooperation of all those who knew his father as surgeon, teacher, friend or citizen, in the collaboration of his biography. Any information whatever which may be sent will be greatly appreciated. Address Dr. Charles H. Parkes, No. 1725, 25 E. Washington Street, Chicago.

---

## RUSH MEN AT MEETING OF ILLINOIS STATE MEDICAL SOCIETY IN DECATUR

It is expected that there will be an enthusiastic gathering of Rush men at the meeting of the Illinois State Medical Association. Besides the usual gathering from the state in general, special attempts are being made to assure a big attendance from Chicago. The secretary of the Chicago Medical Society has arranged with the Illinois Central Railroad for a Hotel Train consisting of a diner, buffet car, compartment sleeper and ordinary sleeper. This train is to be parked in Decatur away from the noise of the station, and special sanitary arrangements will be made to obviate unpleasant conditions. A fare for the round trip of \$6.72 has been made. For sleeping car rates, the following have been established:

Compartment for two persons.....	\$18.00
Sections in sleepers, upper and lower berth.....	13.25
Total expense, exclusive of meals:	
Highest .....	15.72
Lowest .....	13.47

The train will leave Chicago at noon, 12:02, and arrive in Decatur at 4:30 p. m., May 19th. It will leave Decatur May 21st at 4:00 p. m., arriving in Chicago at 8:00 p. m.

It is proposed that Wednesday, May 20th, be selected as the date for the Rush alumni meeting and dinner. From present prospects this will be the biggest alumni meeting ever held at meetings of the state society. Help make it a success. We want to see you there. It will be an event you will want to tell about when you return.

# Announcement

---

**W**E are going to celebrate our Seventieth Anniversary by moving into larger quarters, having leased the entire five story building on the east side of Michigan Boulevard, two doors north of Randolph St. This gives us considerably more space than we now occupy, enabling us to combine our Factories and Salesrooms which will insure all our patrons even more speedy and efficient service than heretofore. The address of our new location is 155-157 North Michigan Boulevard.

**SHARP & SMITH**

# RUSH MEDICAL COLLEGE

In Affiliation with the  
**UNIVERSITY OF CHICAGO**

**CURRICULUM**—The fundamental branches (Anatomy, Physiology, Bacteriology, etc.) are taught in the Departments of Science at the Hull Biological Laboratories, University of Chicago. The courses of two (or three) clinical years are given in Rush Medical College and in the Presbyterian, the Cook County, the Children's Memorial, the Hospital for Destitute Crippled Children, and other Hospitals.

**FIFTH YEAR**—For students entering the Medical Course at the beginning of the summer quarter, 1914, or thereafter, a fifth year will be required for graduation. The work of this fifth year will consist of: (A) An internship in a hospital approved by the faculty and taken under conditions prescribed by the faculty. (B) Advanced work as a Fellow or Research Student in one of the departments of the College with the presentation of a thesis embodying original work.

**SUMMER QUARTER**—The college year is divided into four quarters, three of which constitute an annual session. The summer quarter, in the climate of Chicago, is advantageous for work.

**ELECTIVE SYSTEM**—A considerable freedom of choice of courses and instructors is open to the student. This is not designed, however, to encourage the student to fit himself for any special line of practice, but for its pedagogic advantage.

**GRADUATE COURSES**—Advanced and research courses are offered in all departments. Students by attending summer quarters and prolonging their residence at the University of Chicago in advanced work may secure the degree of A.M., S.M. or Ph.D. from the University.

**PRIZE SCHOLARSHIP**—Six prize scholarships—three in the first two years and three in the last two (clinical) years—are awarded to college graduates for theses embodying original research.

**LIMITED CLASSES**—By a recent vote of the faculty and trustees of Rush Medical College the number of students admitted to the courses next year is to be limited to 120 students in each of the junior and senior classes. No applications will be received after Sept. 1st, 1914. Students will be accepted in the order of receipt of application. It is the purpose of the faculty to restrict the students in the clinical courses to the number that can be adequately instructed by the modern pedagogic methods which have been instituted.

## CALENDER OF RUSH MEDICAL COLLEGE—1914

March 30, Monday—Spring Quarter begins.  
May 7, Thursday—Second Term, Spring Quarter begins.  
May 30, Saturday—Memorial Day; a holiday.  
June 8, Monday—Special Clinics for the Alumni Association.  
June 9, Tuesday—Special Clinics; Annual Business Meeting of the Alumni Association.

tion; Class-Day Exercises of the Graduating Class.

June 10, Wednesday—3:00 p.m., Graduating Exercises; 6 p.m., Annual Reception and Dinner of the Faculty and Alumni.

June 11, 12, 13, Thursday, Friday, Saturday: Quarterly Examinations.

June 13, Saturday—Spring Quarter ends.

**June 15, Monday, Summer Quarter Begins**

**TUITION, \$60.00 per quarter—no laboratory fees**

*Complete and detailed information may be secured by addressing*

**RUSH MEDICAL COLLEGE, CHICAGO, ILL.**

## PROGRAM FOR THE BANQUET

HOTEL SHERMAN, JUNE 10, 1914, AT 6 P. M.

Toastmaster.....	Dr. Frank Billings
The Faculty.....	Dr. Otto T. Freer
The Alumni.....	Dr. Arthur M. Corwin, President
The University.....	Prof. James R. Angell
The Graduates.....	Charles Moman Johnston

## ATTENTION! CLASS OF '84

June 10, 1914, at 1 p. m., at the Bismarck Restaurant, 175 W. Randolph St., Chicago, we will meet as we did five years ago. Be sure and respond so we will know that you are alive and will be present.

Don't forget the date, hour and place, and be prepared to do justice to the name of Old Rush.

DR. E. A. BOAS, 1205 N. LaSalle Street.  
DR. R. A. PETERS.

## THE GROWTH OF THE ENDOWMENT FUND

The following contributions have been received since the last issue of the BULLETIN:

J. S. Kauffman.....	\$30
J. B. Murphy.....	50
R. C. Fullenweider.....	30
H. B. De Bey.....	30
H. A. Patterson.....	5
A. D. Bevan.....	100
Max Thorek .....	30
William Engsberg .....	30
B. J. Wadey.....	30
I. D. Wishoff.....	5
A. C. Ecke.....	30
J. E. Rhodes.....	30

1908	Grady, H. S.	Eye	Chicago Eye, Ear, Nose and Throat	Mon., Wed., Fri.	10-11	25	
1908	Riley, Floyd B.	Pathology	Children's Memorial	Wednesday	3-4:40	40	

## MEETING OF RUSH ALUMNI IN DECATUR

The Illinois State Medical Association held its annual meeting at Decatur, May 19, 20, 21.

One of the most distinctive and pleasant features at this meeting was the Wednesday noon gathering of the clan of "Old Rush." At the Decatur Club Rooms, in its large assembly hall, luncheon was served for about one hundred, and much credit is due to the local arrangement committee for this large gathering. The local committee, through its chairman, Dr. Parrish, and its secretary, Dr. Bell, had everything provided before the arrival of the visitors. At 12:15 the class men began to arrive, and at 12:45 the long procession began taking possession of the banquet hall. No previous program had been agreed upon and, as soon as all were comfortably seated, in order to improve every minute so as to complete our reunion in time to give every man an opportunity to return to his section at 2:30, the chairman of the Alumni Reunion Committee, Dr. John Ritter of Chicago, called the meeting to order. He introduced Dr. Parrish, who acted as presiding officer. In taking the chair Dr. Parrish thanked the members for this honor, stating that he intended to call on many members for a few remarks to be limited to five-minute talks.

He first introduced the oldest graduate present, Dr. P. J. Herman, class of 1863, who, in a few well-chosen words, referred to old Rush fifty years ago.

The next speaker was Dr. Cas. Chenoweth, class of '69, Decatur, who referred felicitously to the days when Rush was young. Dr. Chenoweth was accompanied by his father, by far the oldest graduate in the city, if not in the state. Though not a graduate of Rush he is always interested in the good work that Rush is doing.

The next speaker was Dr. T. C. Murphy, class '68, formerly of Hopedale, Ill., now residing in the South. Dr. Murphy is contemplating the growing of pecans. He spoke in glowing and earnest words about the days long, long gone by when he was a student, and stated that from his first entry as a student up until the present time he has always looked upon Rush as the greatest medical school in the country.

The chairman now referred to those who are taking a most active part in the affairs of the Alumni Association, and called on Dr. A. M. Corwin, '90, President of the Alumni Association, for a few words. Dr. Corwin referred briefly to the work outlined for the past year, its achievements, and the splendid results secured in the establishment and the vigorous growth of our endowment fund.

Dr. Briton, Athens, class '., who is now installed as president of the Illinois State Medical Association; Dr. John A. Robison,

class '80, president of the Illinois State Board of Health, and Dr. C. P. Caldwell were then called upon for short talks.

Dr. D. W. Graham, though not an alumnus of Rush, but one whom we look upon as our adopted son, has for many years been connected with the school as a clinical teacher in surgery responded with a few remarks.

Dr. Otto Freer, class '79, who has always contended that the class of '79 was the best class that ever graduated; Dr. G. A. Butler, class '89, now of Mudlavia, Ind., who considers the class of '89 by far the better one; Dr. W. S. Noble, class '88; Dr. McElvaine, Peoria, class '81; Dr. Marmon, Bloomington; Dr. Ottis, Springfield, class '96; Dr. Burroughs, Urbana, class '82; Dr. Evans, class '86, all responded promptly.

One of the visiting members, not an alumnus, Dr. P. J. H. Farrell, Chicago, gave a very witty talk.

Dr. K. K. Koessler, graduate of Vienna, now instructor at Rush, gave us a very pleasant and interesting account of how it came about that he is a member, and how he became associated with Rush. We all expressed a hope that his son will at some future time be inducted into the fellowship at Rush.

Dr. Myer, though not a graduate, attended Rush in 1871, the year of the great fire. It is on that account that he is not a graduate of Rush.

The chairman then called upon Dr. John Ritter, chairman of the Alumni Reunion Association, who closed with a few remarks. He asked for more than five minutes as he had quite a little to say. He desired at first that the following telegram be sent to the Republican Central Committee of California at Los Angeles.

"That we graduates of Rush Medical College in reunion assembled express our confidence in the executive ability of Dr. Norman Bridge of Los Angeles, Cal., a graduate of the class of '78; and that we highly appreciate the appropriate and very commendable efforts being put forth by the young men of California to place in nomination his name for chief executive officer in the state of California, that of governor."

It was through the magnanimous, unselfish and generous spirit of Dr. Norman Bridge, and his true loyalty to Old Rush that the establishing of the Rush Alumni Endowment Fund first received its substantial impetus by his liberal donation of one thousand dollars in June last.

This was made a motion, seconded by Dr. Corwin. It was unanimously approved that such a telegram be sent. In closing he requested that every alumnus who contemplated attending the meeting of the American Medical Association at Atlantic City in June next take an active interest in the Rush Alumni Reunion, for which arrangements are now being made. A rising vote of

thanks was given to Dr. Parrish and Dr. Bell and the local committee for their untiring efforts in bringing about the gathering at Decatur.

The meeting then adjourned.

---

## MEETING OF THE OHIO STATE ALUMNI ASSOCIATION OF RUSH MEDICAL COLLEGE

On the evening of May 6, 1914, a small but enthusiastic group of alumni of Rush Medical College, practicing in Ohio, met at the Virginia Hotel, Columbus, Ohio, for the purpose of organizing a State Alumni Association. The meeting was held during the sessions of the Ohio State Medical Association. After the banquet had been served the temporary chairman, Dr. E. F. McCampbell, introduced Dr. John Ritter of Chicago, who spoke in a very interesting and illuminative way of the history of Rush Medical College and its subsequent development. He explained somewhat in detail the present affiliative relations of the college and the plans for immediate development. Those present were also deeply interested in the plans of the general Alumni Association for the creation of an endowment fund for the purpose of carrying on scientific research. It was quite generally agreed that Ohio would make some contribution toward this general fund.

The following alumni were present:

Dr. P. B. Brockway, 1900, Toledo.  
Dr. G. W. Rogers, 1900, Columbus.  
Dr. T. A. Evans, 1899, Columbus.  
Dr. C. D. McCoy, 1890, Kenton.  
Dr. H. W. Sima, 1908, Cambridge.  
Dr. Carl W. Sawyer, 1906, Marion.  
Dr. R. D. Spencer, 1913, Piqua.  
Dr. E. M. Allen, 1911, Columbus.  
Dr. Craig Bowman, 1913, Upper Sandusky.  
Dr. A. S. Barnes, 1900, Columbus.  
Dr. Thomas F. Keller, 1881, Toledo.  
Dr. L. C. Stiles, 1906, Austinburg.  
Dr. O. H. Dunton, 1893, Massillon.  
Dr. M. T. Dixon, 1887, Columbus.  
Dr. J. J. Boone, 1887, Mt. Victory.  
Dr. E. F. McCampbell, 1912, Columbus.

Subsequent to Dr. Ritter's remarks short talks were given by Dr. Albert S. Barnes of the class of 1900, Columbus, Ohio; Dr. Thomas F. Keller, class of 1881, of Toledo, Ohio; Dr. O. H. Dunton, class of 1893, Circleville, Ohio; Dr. M. T. Dixon, class of 1887, Columbus, Ohio; Dr. J. J. Boone, class of 1887, from Mt. Victory, Ohio, and Dr. E. M. Allen, class of 1911, Columbus, Ohio.

The meeting was on the whole a very enthusiastic one. One of the incidents of a pleasurable character was that of the meeting of Dr. Dixon and Dr. Boone, both graduates of the class of 1887. They had not seen each other since the time of graduation twenty-seven years ago, and neither knew the other was practicing in Ohio. Many old friendships were renewed and the prospects for an active state organization seemed to be exceedingly good.

The officers of the State Association were subsequently elected and are Dr. A. S. Barnes, Columbus, Ohio, president, and Dr. E. F. McCampbell, Columbus, Ohio, secretary-treasurer.

## UNIVERSITY OF CHICAGO

**CURRICULUM**—The fundamental branches (Anatomy, Physiology, Bacteriology, etc.) are taught in the Departments of Science at the Hull Biological Laboratories, University of Chicago. The courses of two (or three) clinical years are given in Rush Medical College and in the Presbyterian, the Cook County, the Children's Memorial, the Hospital for Destitute Crippled Children, and other Hospitals.

**FIFTH YEAR**—For students entering the Medical Course at the beginning of the summer quarter, 1914, or thereafter, a fifth year will be required for graduation. The work of this fifth year will consist of: (A) An internship in a hospital approved by the faculty and taken under conditions prescribed by the faculty. (B) Advanced work as a Fellow or Research Student in one of the departments of the College with the presentation of a thesis embodying original work.

**SUMMER QUARTER**—The college year is divided into four quarters, three of which constitute an annual session. The summer quarter, in the climate of Chicago, is advantageous for work.

**ELECTIVE SYSTEM**—A considerable freedom of choice of courses and instructors is open to the student. This is not designed, however, to encourage the student to fit himself for any special line of practice, but for its pedagogic advantage.

**GRADUATE COURSES**—Advanced and research courses are offered in all departments. Students by attending summer quarters and prolonging their residence at the University of Chicago in advanced work may secure the degree of A.M., S.M. or Ph.D. from the University.

**PRIZE SCHOLARSHIP**—Six prize scholarships—three in the first two years and three in the last two (clinical) years—are awarded to college graduates for theses embodying original research.

**LIMITED CLASSES**—By a recent vote of the faculty and trustees of Rush Medical College the number of students admitted to the courses next year is to be limited to 120 students in each of the junior and senior classes. No applications will be received after Sept. 1st, 1914. Students will be accepted in the order of receipt of application. It is the purpose of the faculty to restrict the students in the clinical courses to the number that can be adequately instructed by the modern pedagogic methods which have been instituted.

### CALENDAR OF RUSH MEDICAL COLLEGE—1914

March 30, Monday—Spring Quarter begins.  
May 7, Thursday—Second Term, Spring Quarter begins.  
May 30, Saturday—Memorial Day: a holiday.  
June 8, Monday—Special Clinics for the Alumni Association.  
June 9, Tuesday—Special Clinics; Annual Business Meeting of the Alumni Association.

tion; Class-Day Exercises of the Graduating Class.  
June 10, Wednesday—3:00 p.m., Graduating Exercises; 6 p.m., Annual Reception and Dinner of the Faculty and Alumni.  
June 11, 12, 13, Thursday, Friday, Saturday: Quarterly Examinations.  
June 13, Saturday—Spring Quarter ends.

**June 15, Monday, Summer Quarter Begins**

**TUITION, \$60 00 per quarter—no laboratory fees**
